## PROFESSIONAL BACKGROUND

### Zemoga (09/2020 - Now)

Front-End Developer

- Use Vue.js and the client's design system to build a modern web application applying standards and best practices. Work and collaborate with multiple teams in the project.

Stack: We use the Monorepo architecture with Lerna. Vue js with Vue Router and Vuex to handle state through the application. I worked on the migration of the unit testing framework from Mocha & Chai to Jest, adding accessibility to the application, and many other features.

Other technologies: React, TypeScript, Webpack, Git Hooks, Prettier, ESLint, Storybook, Jenkins, SonarQube, SASS.

### Universidad de la Costa CUC (08/2018 - 09/2020)

Web Developer

- Use React.js to build scalable web apps to supply solutions and improve the company's processes after meeting with intern clients to catch their requirements. Worked on the creation of our own design system and the main grid which is the most important component in the application.

Stack: We use a Monolithic Architecture. React Router and Redux, NodeJS and GraphQL

### Universidad del Norte (07/2014 - 01/2015)

Web Developer (Internship)

- Developed web applications for maintenance department to manage the inventory of the company's electronic resources using technologies like JQuery, Ajax, Bootstrap, PHP and MySQL.
