

ALEJANDRO BENJUMEA

CAREER SUMMARY

Frontend Web developer based in Medellín, with over 10 years of experience building rich UI web applications using cutting-edge technologies and best practices. Maintaining a high awareness regards user experience, accessibility, code quality, and scalability. With experience in SSR, server-side code integration, client-side performance, component design, responsive layout, advanced build workflow, and sense of digital design. Passionate about change. Capable of lifelong learning, active listening, service attitude, leadership and teamwork skills. I consider myself an active and committed person who always seeks the best results in the activities undertaken.
