/ WORK EXPERIENCE

>> Java Developer

Equifax | 08/2021 to present

As a backend developer I work with Java 11, GIT, Maven and Spring Boot. For testing I use JUnit, Swagger and Postman. To deploy the projects I use ftp clients, Google Cloud and the Jenkins pipeline. The work framework is an Agile methodology with Scrum.

>> Java Developer

Red Link S.A. | 12/2019 - 08/2021

I worked mostly as a backend java developer for the creation of a new bank system for "Banco Ciudad".

The main features and technologies that I used were Java 8, Maven, Spring Boot, Hibernate, easy-batch, SQL Oracle, REST APIs, IntelliJ, postman, putty, SVN, GIT, Trello and Agile methodologies.

>> Fullstack Developer

FK Tech SRL | 05/2019 - 12/2019

I worked for the client Arcos Dorados, developing and maintaining the systems used in the McDonald's stores in Argentina and Brazil.

Main features and technologies that I was involved:

JavaScript for different projects, C language for the core system, MariaDB, PostgreSQL, Jira, Confluence, Bitbucket, Git and Agile methodologies.

>> Fullstack Developer

Adistec | 11/2016 - 05/2019

Design and development of solutions in the ERP Netsuite for clients in different countries.

Relevant projects: Java middleware for interaction between REST-API and SOAP API.

Automation of different Areas of the company: quoting Systems, HR management, marketing, sellers, certificates, accounting and CEO report systems.

Mainly used technologies used: Javascript, jQuery, Suitescript, Java 8, MySQL, CSS, HTML, Google Charts, PHP, Git, Eclipse, Jira and I used a Kanban board system.
