

# Carlos Anguila

Software Developer

+57318 782 7580

canguila@gmail.com

www.linkedin.com/in/carlosanguila/

Medellin - Antioquia - Colombia

## Education Background

### Universidad De Catalunya

FullStack Development  
2020 - 2021

### Universidad Del Norte

Software Engineer Specialist  
2014-2015

### Fundación Universitaria San Martin

Systems Engineer  
2005-2010

## Expertise & Skill

Java 8,11

Code reviews

API REST

PHP

Spring Framework

Spring Boot

Microservices

Laravel

Scrum

Kanban

Git

Usability principles

Java Server Faces (JSF)

Docker

## Work History

### Perficient

Backend Software Engineer  
2022 - Present

- Created enhancements to resolve client problems and meet operational standards.
- Balanced design principles and technology standards with product timelines and customer-specific requirements
- Resolved scalability problems and addressed security concerns.
- Wrote unit tests to evaluate high code coverage.
- Reworked applications to meet individual customer demands.
- Reviewed code and debugged errors to improve performance.
- Troubleshoot various software issues by using debugging processes and coding techniques.

### Globant

Java Developer SSR  
2020 - 2022

- Resolved problems, improved operations and provided exceptional service.
- Quickly learned new skills and applied them to daily tasks, improving efficiency and productivity.
- Performed duties in accordance with all applicable standards, policies and regulatory guidelines to promote safe working environment.
- Participated in continuous improvement by generating suggestions, engaging in problem-solving activities to support teamwork.
- Proved successful working within tight deadlines and fast-paced atmosphere.
- Integrated front-end elements into applications.

## Expertise & Skill

Javascript

React

Angular

Kubernetes

NodeJs

Good listening skills

Multitasking abilities

## Work History

### Thomas Processing & Systems

Research and Development Senior Engineer

2016 - 2020

- Design and analyze information systems, using data modeling tools, programming language, according to the requirements.
  - Guarantee the reliability, coherence and evolution of the computer system from technical and functional point of view, that allows complying with the satisfaction policies to the company's client.
  - Participate in the definition of new strategies and technological objectives in order to innovate and to implement new technologies. Performing reviews and checks with the client to detect failures or to improve the different software products
- Development of web platforms to support electoral operations across the nation.

### Data Processing & Systems

Research and Development Senior Engineer

2011 - 2016

- Design and analyze information systems, using data modeling tools, programming language, according to the requirements.
- Participate in the definition of new strategies and technological objectives in order to innovate and to implement new technologies. Performing reviews and checks with the client to detect failures or to improve the different software products
- Development of web platforms to support electoral operations across the nation

## Conferences & Courses

### Project Development Using Spring Boot

Udemy - 2022

### Learn Java Functional Programming

Udemy - 2022

## Summary

Innovative IT professional offering vast experience leveraging software engineering and DevOps methodologies to deliver highly effective and creative solutions to business and technology challenges. Utilizes highly attuned analytical skills to develop IT and business strategies employing cutting-edge technologies to increase productivity
