

Name: Jean Ramon Misquez Villanueva

Email: misquez.jean@hotmail.com

Contact#: 6461285007

PROFESSIONAL SUMMARY:

- Overall 9+ years of IT Experience a large focus on Front End Technologies
- I have experience development with HTML 5, CSS 3, SCSS, JavaScript native, new frameworks like AngularJS, Angular, Ionic and NodeJS, ReactJS, NestJS, .Net.
- Experienced working with Linux Environment working as a Linux System Administrator.
- Strong experience with Responsive Web Design both with native CSS or SCSS and/or using frameworkslike Bootstrap 2+
- Highly Experienced debugging web application
- Large Experience working with Version Control System's like SVN and GIT
- Experience working under agile methodologies like SCRUM and Kanban
- Experience working with JIRA, Gitlab and Version1
- Experience working with server automation with scripts language like BASH.
- Experience working with Nodejs and ExpressJS API development.
- Experience working with .Net building RESTful API.
- Experience working with Cobbler, Puppet, SVN, Bash Scripting, Centos 5/6/7, DNS, Web Applications, Hypervisors.
- Experience in Network services including Apache, Tomcat, Sphinx, Varnish Cache, Memcached.
- Manage BIG-IP F5 load Balancer.
- Permissions per User Management.
- Familiarized with Teamwork in person and remotely, working in 24/7 schedule with on call rotation.
- Experience doing containerization with dockers.
- Experience working with CI/CD with Bitbucket pipelines, GitHub actions and Jenkins.

Technical Skills:

Programming language	Javascript, Typescript, .Net
Database	MySQL, MSSQL, SQL Server, MongoDB
Backend	NodeJS, C#
Operating Systems	Linux CentOS 5/6/7, Linux Ubuntu, Windows, MacOS
Frontend Technologies	AngularJS 1.5, Angular 2+, jQuery, HTML 5, CSS 3,

	SCSS, Bootstrap 2+
Version Control	GIT, SVN
Agile Methodologies	SCRUM, Kanban
Project Management	Atlassian tools (Jira, hipchat, bamboo, confluence)
Containers	Dockers
Automated deployment	Jenkins, Bitbucket Pipelines, GitHub Actions

EDUCATION:

Bachelor's Degree, Computer System Engineer, Puerto Peñasco Technological Institute

PROFESSIONAL EXPERIENCE:

BigRio - VividHealth, Remote **Oct 2023 – May 2024**
Fullstack Developer

Project Description:

- Work in the MVP phase and Second phase.

Roles & Responsibilities:

- Develop multiple functionalities with Node and Nest.
- Develop multiple functionalities with Angular.
- Create / Modify Unit test with Jest.
- Code reviews.
- Participate in Scrum ceremonies.
- Fix bugs and defects.

Environment: NodeJS, Nest, Angular, GIT, GitHub, Bootstrap, Angular Material, MongoDB, JIRA, HTML, SCSS.

Logitix, Remote **August 2021 – January 2023**
Senior Front-End Developer

Project Description:

- Migrate MVC AngularJS 1.5 legacy application to Standalone Angular 12 application.

Roles & Responsibilities:

- Senior Front-End Developer.
- Decide the application front end technologies between any modern framework like Vue, React or Angular
- Implement good practices and coding standards.
- Code reviews.
- Choose the architecture that is going to be applied in the project.
