JS Developer - Clouding enthusiastic

☎ [5567733943](tel:5567733943)

I am a proactive developer specializing in web UI development and cloud computing, with over 13 years of extensive experience in creating web applications using modern JavaScript frameworks.

My passion for cloud computing enables me to effectively integrate code repositories, implement development environments using the latest technologies.

- Team-worker with ability to create synergy and, hard work.
- I am highly skilled in self-directed learning.
- Comfortable working with emergent technology.

Career history:

Company	City	Role	From:	To:
Freelance	CDMX, México	JS Developer	May 2024	NOW

- Mocked or prototyping UI's
- Front end apps developed with React.
- Manage domains and web application with CANVA and AWS
- Create a Shopify apps.
- Use Express and Sails to create microservices
- Create Netlify apps
- Use VERCEL to deployment next apps.

Functional Experience: Create proposal to develop web, store and tracking task

Tools: **AWS, SAM, Git hub, Shopify, React, Next**

Company	City	Role	From:	To:
Enitma – Viva Aerobus	CDMX, México	TL Full Stack JS and Cloud	Nov 2023	May 2024

- Lead 5 members team.
- Mocked or prototyping UI's
- Front end apps developed with React.
- Manage Git Flow.
- Graph QL interaction with AWS gateway
- Datadog integration with AWS Watch cloud.
- CI/CD pipelines to deployment API's, microservices, Web pages at S3 bucket that represent the front end and back end.
- Developer environment automatization.
- Added basic Unit Testing with React testing library.
- Migrate on premise .net app to Cloud app base on microservices model.
- Develop microservices with lambda function.

Functional Experience: Tracking task member, create back log and history user. Worked with Scrum

Tools: **NPM CLI, NMV, Datadog, CSS, Type Script, React JS, Sam CLI, NodeJS, DynamoDB, Lambda functions, Cloud formation, Gitlab, Jira, Redux, Tan Stack Query, Apollo QL, API Rest**

Company	City	Role	From:	To:
Globant – Mattel	CDMX, México	TL Full Stack JS and Cloud	Oct 2022	June 2023

- Lead 2 members team.
- Microsites creation with React JS
- Route and State management with Redux and Tan Stack Query.

- Graph QL API implementation with DynamoDB.
- Planned, prototype and design components for a headless CMS.
- Added pipelines for branches like main, dev or QA (Prod, Developer and Testing environments)
- Environments implementation Prod, QA, Dev, Stage environment with Netlify and GitHub platforms
- Develop Shopify store and publish page components.
- Configuring Interface Communication Methods between CMS and Shopify.
- DevOps managing

Functional Experience: Manage Scrum with Jira, documentation. Worked with Scrum

Tools: **GitLab, Next JS, Netlify, React JS, Liquid JS, Lambda functions, Content Stack, NPM CLI, SAM CLI, Type Script, NVM, Material UI, Tailwind, Jira, Graph QL, AWS Gateway, Rest API**

Company	City	Role	From:	To:
---------	------	------	-------	-----

Globant – Autodesk	CDMX, México	TL Software developer	Oct 2021	Aug 2022
--------------------	--------------	-----------------------	----------	----------

- Lead 4 members team.
- Prototyping with Adobe XD and Figma
- Added unit testing checker to the existing pipelines
- Update modules to the latest version.
- Implement Unit and E2E testing.
- Make PR reviews as a CODE OWNER.
- Update syntax errors in the legacy application.
- Verify functionality with the latest modules versions.
- Release and track applications with Jenkins platform.

Functional Experience: Manage and make 1:1 meeting with team members. Worked with Scrum

Tools: **NPM CLI, ASDF, Brew, YARN, NVM, NRM, Docker, Blue Ocean, jQuery, React, Node, GitHub, Jenkins, Cypress, Jira, CSS, Bootstrap, Material UI, Jenkins.**

Company	City	Role	From:	To:
---------	------	------	-------	-----

Nagarro – Cox Automotive	CDMX, México	React Developer	March 2021	Oct 2021
--------------------------	--------------	-----------------	------------	----------

- Maintained web apps, and CMS applications.
- Created components and implement into the CMS.
- Deploy, QA, verify functionality, and regression testing.
- Release and track applications with bash cli system.

Functional Experience: Technical Support, Review Issues and get the DoD in the user history

Tools: **Jira, CLI, Github, Css, HTML, React, Vanilla JS, terraform, AWS, NPM CLI, AWS CLI, YARN, ASDF, Jira. Next, Type Script**

Company	City	Role	From:	To:
---------	------	------	-------	-----

Cogent IBS – Skandia	CDMX, México	JS and Sap Developer	Jan 2019	March 2021
----------------------	--------------	----------------------	----------	------------

- Developed components with React JS and Ant Design patterns.
- Worked with the design thinking patterns for Sap UI5
- Worked with Sails JS/Express and Node JS in the Back End to create a REST/API
- Led 3 developers
- Implemented AWS technologies to manage domains.
- Deployed in AWS with Serverless approach.

Company	City	Role	From:	To:
---------	------	------	-------	-----

Accenture – Gold Corp	CDMX, México	SAP UI5 Developer	Jul 2017	Jan 2019
-----------------------	--------------	-------------------	----------	----------

- Managed an agile team to develop a tool to issued employee credentials.
- Developed application with React JS, Redux, Less and, SAP.
