From: Maracaibo, Venezuela

Currently @ Itagui, Antioquia, Colombia

### PROFESSIONAL CAREER SUMMARY

As a highly experienced senior backend developer with over 10 years of experience, I am passionate about implementing and developing client and staff visions of new websites, online projects, backend applications, RESTful APIs, and more.

My expertise in Java and Kotlin has allowed me to work on international projects and serve clients around the world. I understand that all clients have unique needs, and I am committed to delivering solutions that meet their requirements with respect and professionalism.

I am highly self-motivated and proactive in developing client requirements, always seeking to apply new technologies and stay up-to-date with the latest trends in Kotlin and Java development, backend technologies, and frameworks.

I am enthusiastic about collaborating with other developers and product managers to create innovative solutions that exceed clients' expectations.

## **TECHNICAL SKILLS**

### **Programming Languages:**

Kotlin, Java (6, 8 & 11), Nodejs, TypeScript, XML, HTML, SQL, NoSQL, Python.

### **Platforms:**

Windows, Linux, Android OS, Mac, Red Hat, Apache Tomcat and Glassfish, Oracle WebLogic Server 12c, Oracle Content Manager, IBM WebSphere Application Server, JBoss, Rancher, Octopus, Kibana, Azure, AWS, GoogleCloud, Oracle Eloqua, Outreach, Hubspot, IBM, Marketo, Docker, PagerDuty, ServiceNow, Nifi, Zapier, HubSpot, Striim.

### **Frameworks:**

Scrum, Kanban, Spring Framework (Core, Boot, Data, MVC, Batch, AOP, and Security; 3 and 4), JBoss Seam (JPA, EJB 3.0), Hibernate, JHipster, EJB, Struts, OAuth2, Web API's, .NET, SOAP WS, PrimeFaces, JAVA Mobile, Entity Framework, Serverless.

### **Interfaces:**

REST, SOAP, MQ.

### **Databases:**

Oracle, MySQL, PostgreSQL, MongoDB, SQL Server, DB2, Cassandra, ElasticSearch, DynamoDB.

### **Other:**

GIT, Maven, SVN, Eclipse, Netbeans, JBoss Developer Studio, Jira, Stash, Bitbucket, Bamboo, HipChat, Confluence, Jenkins, Sonar, NPM, Gulp, OOP, MVC, DDD, SVN, TFS, CISCO, ActiveMQ, Rhapsody, Perforce, Terraform, Grafana, Prometheus, ServiceOne, Lightstep.

## **LANGUAGES**

Spanish (Native)

English (C1)

## PROFESSIONAL EXPERIENCE

**GCPAT** | Boston, USA (Remote) | *Software Developer* | 01/11/21 – Present

Projects: TruckLog Services

Technologies: Kotlin, Java 11, Spring Boot, AWS, Terraform, Grafana, Prometheus, ServiceNow, Docker, Kafka Streams, RabbitMQ, Lightstep

Responsibilities:

- Develop and maintain backend solutions for a variety of client projects
- Use Java, Kotlin, and other technologies to create efficient, scalable, and reliable applications
- Collaborate with product managers, designers, and other developers to ensure that the company's applications meet their requirements and are delivered on time

**Relevus** | Colorado, USA (Remote) | *Software Developer* | 01/12/19 - 30/10/21

Projects: Relevus Marketplace, Relevus CRM

Technologies: Java 8, Apache Nifi, Spring Boot

Responsibilities:

- Developed and maintained backend solutions for Relevus's flagship products, using Java, Spring Framework, and other technologies
- Collaborated with the front-end development team to integrate the backend functionality with the user interface
- Participated in product planning and design discussions to ensure that the products meet customer requirements and were competitive in the marketplace
- Performed code reviews, identified and addressed performance bottlenecks, and resolved technical issues

**Nordstrom** | Seattle, USA (Remote) | *Software Developer* | 05/12/18 - 30/11/19

Projects: Nordstrom Rewards, Nordstrom Portal, Checkout app

Technologies: NodeJs, Java 8, AWS, Serverless

Responsibilities:

- Developed and maintained backend solutions for Nordstrom's e-commerce platforms, using Java, Spring Framework, and other technologies
- Worked closely with the business team to identify new features and functionality, and ensure the applications met customer expectations
- Collaborated with the QA team to ensure software quality and performance standards were met

**REI** | Seattle, USA (Remote) | *Software Developer* | 01/11/17 - 30/11/18

Projects: REI.com, REI Mobile Apps, Checkout app

Technologies: Java 8, AWS, Kubernetes

Responsibilities:

- Developed and maintained backend solutions for REI's e-commerce platforms and other applications, using Java, Spring Framework, and other technologies
- Worked closely with the product management and design teams to ensure the applications met customer expectations and business goals
- Participated in code reviews, design discussions, and troubleshooting sessions with other developers
- Collaborated with the QA team to ensure software quality and performance standards were met

**ON24** | San Francisco, USA (Remote) | *Software Developer* | 01/09/16 - 30/10/17

Projects: ON24 Demand, ON24 Connect

Technologies: Java 8, Nodejs, Docker

Responsibilities:

- Developed and maintained backend solutions for various client projects using Java, Spring Framework, and other technologies
- Worked closely with product managers
- Participated in code reviews, design discussions, and troubleshooting sessions with other developers
- Collaborated with the QA team to ensure that software releases were bug-free and met quality standards

**Navihealth** | San Francisco, USA (Remote) | *Java Development Team Leader* | 01/12/14 – 27/08/16

Projects: Tag Support Service, Discharge Migration Service, Transition Services, Eventing Services, Quickcase.

Technologies: Java 8-11 & Nodejs, Spring Framework, GoogleCloud, Microservices, JHipster, Oracle DB, MongoDB, Rhapsody, ActiveMQ, Docker, Kibana, Rancher, Octopus, AWS, Azure, Kafka, Kubernetes

Responsibilities:

- Led a team of seven developers, supervising their performance and applying good programming practices
- Developed and maintained various projects using Java, Spring Framework, and other technologies, such as Microservices and Kafka
- Collaborated with other teams to integrate solutions and resolve conflicts

**BitDubai** | Budapest, Hungary (Remote) | *Android Development Team Leader* | 01/08/13 – 28/11/14

Project: Fermat (Crypto-currency e-wallet)

Technologies: JAVA 8, Android OS.

Responsibilities:

- Led a team of three developers, supervising their performance and applying good programming practices
- Developed and maintained the Fermat project, a crypto-currency e-wallet, using Java and Android OS
- Interacted with clients from various countries, such as Venezuela, Argentina, USA, and Dubai

**BOD** | Maracaibo, Venezuela | *JAVA/Android OS Developer* | 15/01/11 – 31/07/13

Project: NBL (New online banking platform)

Technologies: JAVA 8, Android OS Framework, SOAP WS

Responsibilities:

- Developed and maintained the NBL project, a new online banking platform, using Java and Android OS
- Estimated, integrated, and resolved conflicts in all solutions
- Implemented frontend and backend in Java and Android OS app and worked as a WebLogic Server Administrator.

## **EDUCATION**

- La Universidad del Zulia (LUZ), Maracaibo, Venezuela 04/2009 – 09/2015  
Computing Degree 16/20
- Universidad Dr. Rafael Bellosillo Chacin (U.R.B.E), Maracaibo, Venezuela 05/2010 – 03/2016  
Systems Engineering 17/20
- U.E. Coronel Miguel Antonio Vazquez, Maracaibo, Venezuela 09/2003 – 07/2008  
Bachelor's Degree 19/20

## **TRAININGS/COURSES**

- Advanced English at CEVAZ.
- Free Software Development IBM International.
- Application Development, IBM Advanced Education
- Programming Fundamentals, IBM Advanced Education
- IT and Networking Fundamentals, IBM Advanced Education
- Cisco CCNA I Networking Basics
- Cisco CCNA II Routing Protocols and Concepts
- Cisco CCNA III LAN Switching and Wireless
- Cisco CCNA IV Accessing the WAN
- E-Business, Fundacite Zulia
- Many more from Udemy & Pluralsight
