ABOUT ME

Talented Software Engineer adept at working with customers, team members and project leaders to accomplish software engineering and updating tasks according to timelines. Solid understanding of full development lifecycle. Skilled working with wide range of front-end technologies to produce and evaluate code.

PERSONAL DETAILS

Date of birth:
21/01/1997

Nationality:
Portuguese

WORK EXPERIENCE

Data CoLAB

Mar 2023 - Present
Viana do Castelo

FULL STACK DEVELOPER

I collaborate with a dedicated team to develop specific software to meet the needs of our customers. One of our main responsibilities is creating robust and well-structured system architectures, ensuring that the solutions developed are scalable and flexible. Furthermore, we have a high degree of responsibility in implementing these solutions, ensuring the security and integrity of the system, an essential factor for the trust and satisfaction of our customers. Our commitment is to deliver dynamic, efficient, and secure code, always aligned with the best practices in the sector.

Natixis

customers a tool to manage everything related to their telecommunications. The project was based on an interaction with an external tool which would give the company's employees the basis for them to be able to change, create or remove data from the shopping catalog on the same site. There are still complex functionalities in terms of payments that had to correspond to the legal rules of the country in question.

TECHNOLOGICAL ENVIRONMENT :

ReactJs | testing-library/react | AEM | Styled Components

● FRONTEND DEVELOPER

Adding new functionalities to a back-office that was already operational. This back-office aimed to help some companies negotiate and maintain all electric vehicles, charging stations and customers. We aimed to implement features of the highest complexity such as a map with assets that would be updated every second using web sockets that carried their information. The architecture of this tool was managed and built by all the developers where we all had a strong opinion and responsibility for it. All development was done with the greatest care in terms of programming so that there would be no problems with future changes.

TECHNOLOGICAL ENVIRONMENT :

Angular 7/9 | HTML | SCSS | NX | WebSockets | NGRX

● FULL STACK DEVELOPER

Build a web platform (PortalWEB) based on an application made by the company that ran it only in a windows environment where it was intended to transfer all existing functionalities to the web so that customers could more easily carry out their daily tasks as well as access data outside company. With this in mind, we had a plan to restructure the entire technological front of the company, transforming existing products into a web format.

TECHNOLOGICAL ENVIRONMENT :

ASP.NET MVC | jquery | CSS | HTML | Bootstrap | SQL Server 2012 R2 | Devextreme | Angular

INTERNSHIP

Inforcávido

Feb 2018 - Jul 2018
