## Profile

Professional graduated as a System Engineer from Universidad Industrial de Santander with 6 years of expertise developing Software projects. Currently, being software architect is one of the main functions that characterized my labor in my present job.

The following are the main tools used in my professional performance: *NET, Java, JavaScript, Angular, Oracle, MySQL, Postgress.*

Last but not least, my personal traits are based on a constant dynamism, followed by strong spirit of achievement. My goals are established in the achievement of clear-to-see objectives. Besides, leadership, easy and fast learning, punctuality, honesty and responsibility are the main features which describe my professional and personal performance.
