#### **WORK AREAS:**

- Endava projects: Implementing new features, supporting the existing ones, giving strategic help to the business, leading the projects on technical aspects and on agile methodologies; I was also leading the internship guys through the project in order to get success in the projects, additionally I was part of the agile community in which I had part of my goals teaching the Agile onboardings for the new hires. Finally, I can say I was a technical interviewer also, helping Endava to hire new talents.
- **GCO Grupo Uribe:**  
The placement of credit cards for the Uribe Group was strategically supported, through the development of new functionalities, support of existing ones, implementation of continuous integration - DevOps and facilitation of the work team for conflict resolution.
- **SURA Asset Management:**  
The IT area of SURA Asset Management was strategically supported through the leadership of solutions, work during which needs, solutions and requirements were analyzed so that, through the most agile and the management of resources and suppliers, value was given to the business.
- **TDM – Test Data Management (Sura):**  
It strategically supported the IT area of Sura through the consultancy service in Test Data Management, providing the area in question with a governance model

that empowers the business with guidelines, good practices and tools for the adequate and automated management of test data.

- **Spirit (Protección):**

The client is strategically supported through the integration of financial information systems, allowing the correct valuation of the business and the valuation of its titles and portfolios.

- **PROJECT CORE MP (Coomeva):**

As the project coordinator, I worked with the manager of consulting and the project manager by Coomeva. With my support they managed to orchestrate different fronts of the project using the PMI methodology for project management and further contributed greatly to the documentary management of the project by implementing a tool for such work.

- **SUPPORT TOOLS:**

- **ACTAS ONLINE (Tecnoquímicas)**

I helped all of the employees of Tecnoquímicas, analyzing and determining the best tools for managing their meetings and commitments during the time in an efficient web application.

- **STRATEGIC PLANNING:**

- **SYSTEM INFORMATION OF STRATEGIC PLANNING (Tecnoquímicas)**

System for empowerment senior management with the best tools of Strategic Planning to make more efficient different corporate processes; it also serves for making the best business decisions in Colombia, Ecuador and Central America; Much of these tools are provided by Business Intelligence, such as Balanced Scorecard, allowing the company to see business information from the required perspective. I worked as a software developer and some labors of architecture design in a multidisciplinary team for enhancing the maintainability, extensibility and performance of the system.

- **MANUFACTURE:**

- **SYSTEM OF COSTS AND SUPPLIES (Tecnoquímicas)**

In the manufacturing area, the process was automated to make efficient approval cycles, allowing them to have timely, accurate and consistent information of inputs, buyers and costs.

- **QUALITY:**

- **SYSTEM OF QUALITY CERTIFICATES (Tecnoquímicas)**

In the area of quality, for internal processes of laboratories, I helped the processes to achieve a quality level supported by the best relevant and structured information, able to make the time for quality analysis were employed more efficiently.
