## PROFILE

Systems Engineer graduated from San Buenaventura University of Cali with emphasis on software design and development. Complementary training as a technician in software programming, with experience in software development and interest in the area of development and architecture of software. Motivated to explore new technologies, design patterns and good practices to apply them to the business needs of an organization, excited to face challenges to increase professional development, accompanied by easy adaptability to different work environments and easy learning.

Five-year work experience in Back-End and Front-End development of web applications in the financial industrial and health area with extensive experience in Java, .Net and PL / SQL, due the different positions and projects in which I have worked during this time, I also have more than three years of experience as a freelance developer.

## SKILLS
