• ABOUT ME

Experienced IT Professional with over 9 years of expertise in backend development using Java and Spring. Skilled in full stack development, adept at working with diverse, multicultural teams. Recent experience includes contributions to an important project at The Home Depot company using Spring WebFlux and React.

• ACHIEVEMENTS

- Successfully transitioned the data source for the items search section from GraphQL to REST, delivering the integration flawlessly and without any bugs.
- Took ownership of a web project and successfully implemented it to production in a span of 6 months, decreasing data publication time from 4 hours to 5 minutes.
- Received Extra Miller award for active cooperation and communication with QA team.

• COMPETENCES

- Teamwork and collaboration
- Problem-solving skills
- Responsibility
- Deadline management
- Quick learner
- Detail-oriented
- Result-oriented
