SUMMARY

I'm a Frontend Developer with over 5 years of experience specializing in JavaScript, React, HTML, and CSS. As an expert in building dynamic and scalable web and mobile applications, I excel at creating intuitive user interfaces that enhance user experiences. I've successfully led projects from a technical perspective, collaborating with UX/UI designers, back-end developers, and product owners to deliver high-quality, user-friendly solutions. My expertise includes leveraging modern technologies to design elegant and efficient applications. Additionally, I'm actively expanding my skills in DevOps practices with AWS to streamline development and deployment workflows.

EDUCATION

SERGIO ARBOLEDA UNIVERSITY

Bachelor's degree in Systems and Telecommunications Engineering

SKILLS

PROGRAMMING

Programming Languages:

Javascript-Typescript

Frameworks, Libraries and technologies:

React • Html • Css • Next.js •

State managment • Jest • React

testing library • react test renderer •

Enzyme • Storybook • React native •

Kanban • CI/CD • AWS/CLOUD •

algorithms • data structures • Agile methodology

Tools Platforms:

Git • Jira • Github • AWS

PROJECTS

Winner and mentioned team on several programming competitions ACM/ICPC, IEEE, UNITEC, others.

EXPERIENCE

MERCADO LIBRE | FRONT END DEVELOPER

June 2021 - present | Colombia

- Currently working on MercadoShops, a key platform within Mercado Libre, the largest marketplace in Latin America, serving millions of users monthly.
- Contributed to one of the most complex front-end projects in Mercado Libre, leveraging a microfrontend architecture to build scalable and maintainable solutions.
- Designed and implemented architectures for new projects and initiatives, ensuring seamless integration and optimal performance.
- Led projects aimed at transforming the way sellers create and manage their online stores, focusing on improving user experience and providing intuitive tools.

Technologies: React - Html - Css - Javascript - Typescript - CI/CD

MUNI | FULL STACK DEVELOPER

Sep 2020 - Nov 2021 | Colombia

- I had to participate in the design of new features, estimate them and create them on the main platform.
- I created new applications focused on the logistics of the company, These applications made it possible to keep track of all the orders that had been generated in a given time and to be able to generate routes for the deliverers.

Technologies: React - Html - Css - Typescript

CORFERIAS | FRONT END DEVELOPER

Apr 2020 - Sep 2020 | Bogota, Colombia

- Creation of web applications from 0 and pre-created for the most important events center in Bogotá
- My work was the creation of sites for the events, so it consisted of estimating the time it would take to create the sites.

Technologies: Javascript - Html - Css - React

SNACKS4USA | FRONT END DEVELOPER

Mar 2020 - Apr 2020 | Bogota, Colombia

- Design how the entire system will work, both frontend and backend application.
- Create entire frontend modules for food inventory management within the Sergio Arboleda University.

Technologies: React - Html - Css - javascript

QUILEIA SAS | FULL STACK DEVELOPER

Sep 2019 - Dec 2019 | Bogota, Colombia

- Creation of backend and frontend for cinema in Bogota
- Create frontend modules to consult and purchase movie tickets.
- Create backend modules to return information necessary for consultation and purchase of tickets.

Technologies: React - html - css - javascript
