PROFILE

I'm a highly motivated React/Node developer with 4 years of JavaScript based experience. A problem solver and effective communicator. I enjoy working collaboratively and writing scalable and well-documented software. Currently delivering high-performance technology solutions to meet challenging business demands.

WORK EXPERIENCE

Front-end Developer

Fulcrum Digital Jan 2024 - Present (Contract by project, it ends soon.)

- Developed the internal UI library either by building new reusable components or adding new features to the ones already existing.
- Wrote clean, efficient, and maintainable TypeScript code to create responsive and visually appealing interfaces.
- Ensured cross-browser and cross-device compatibility by thoroughly testing and optimizing front-end code.
- Participate in code reviews, providing and receiving constructive feedback to maintain code quality and best practices.
- Maintain and improve existing codebases, troubleshooting and resolving bugs and issues in a timely manner.

Technologies: Next.js, Hooks, Typescript, Tailwind-ui, Husky, Material-ui, Storybook, Context API

Front-end Developer

Sweatworks Feb 2022 - Jan 2024

- I had the opportunity to help the company with its biggest client in the United States, the Speede project.
- Developed the internal UI library from scratch by building reusable components.
- Researched, designed, implemented, and managed the architecture design plan for the front-end web platform.
- Reviewed code and conducted unit, integration, and end-to-end testing for NestJS and React.
- Lead the optimization strategies for the frontend web app and wrote the software for those strategies.
- Worked closely with UI/UX designers to make decisions on the apps UI designs and practices.

Technologies: React, Hooks, Typescript, Material-ui, Jest, Craco, Nest.js, PostgreSQL, TypeORM, Swagger, AWS, Cognito.

WORK EXPERIENCE

Front-end Developer

Technisys

Feb 2021 - Feb 2022

- Contributed to the internal UI library to create reusable components saving 8 hours of development time a day.
- Identified areas for modification in existing architecture and subsequently developed those modifications.
- Worked with other developers on the re-architect of the new phase of the project in both mobile and web apps.
- Learned Redux-Saga and React Native in a short period of time to be part of the entire project's stack, saving 120 hours of development a month.
- Helped connect a React.js new front-end architecture with a legacy product, based on Java, that was being used by the clients.

Technologies: React, React Native, Redux, Jest, Redux, SASS, Lerna.

Front-end Developer

Big Blue People

Oct 2020 - Nov 2021

- Worked alongside product managers to re-architect a multi-page web app into a React-Redux SPA which improved the page speed by 40%.
- Covered the first steps of the roadmap to migrate the old tech stack to a Node.js API and a Next.js Frontend and at the same time onboard new team members.
- Mentored 4 React trainee developers on documentation best practices within the organization.
- Learned PHP in a very short period of time to be able to collaborate with the old stack.

Technologies: React, Typescript, Jest, Redux, Next.js, Tailwind-ui.
