

JAIME LUNA GARCIA

Java senior developer

jaimlun@icloud.com

Cell Phone +52 33.1232.4251

Experienced Senior Software Developer with 15 years in the software development field and a robust 12-year background in designing, developing, and maintaining Java applications. Expertise across the full software development lifecycle with hands-on experience migrating legacy software to modern architectures. Currently enhancing backend systems and contributing to the overall success of Motivus with a focus on scalable, efficient solutions. Strong analytical mindset, committed to collaboration and problem-solving.

Languages: Java (Advanced), SQL (Intermediate), JavaScript (basic), Python (basic), Go (basic).

Frameworks and tools: Spring, SpringBoot, Git, Maven, Jenkins, Docker, Kafka, Jasper Reports, Selenium, Tomcat, WebLogic, OpenShift, Azure DevOps.

Methodologies: Agile (Kanban, Scrum), Continuous Integration / Continuous Deployment (CI/CD).

Professional experience

Motivus (AgileThought/4thSource)

Senior Java Developer

June 2015 – Present / Remote

- Led the migration of Oracle Reports to a modern Java RESTful API with Spring Boot and JasperReports, improving system efficiency and scalability.
- Spearheaded the migration of WebLogic 12c web services to OpenShift, enhancing system reliability and uptime.
- Managed the transition of WebLogic services from version 10g to 12c, optimizing performance and security.
- Developed, built, and deployed robust REST APIs using Spring Boot, Jenkins, Docker, and OpenShift.
- Collaborated closely with cross-functional teams to ensure seamless integration of backend systems.

UST global

Java Developer

March 2014 - May 2015 / León, Gto.

- Maintained and enhanced retail REST APIs using Spring and Hibernate to support scalable e-commerce solutions.

- Optimized backend systems for improved performance and reduced downtime.

Root Technologies

.NET and Java Developer

October 2012 - September 2013 / CdMx

- Designed and developed reports using JasperReports for Java REST APIs, streamlining data visualization and reporting processes.

- Developed APIs utilizing .NET technologies, ensuring efficient integration with internal systems.

Soluciones Globales de Sistemas

.NET Developer

November 2001 - April 2005 / CdMx

- Contributed to the development of a payroll system, creating several modules for payroll calculations using ASP and ASP.NET, ensuring accuracy and compliance with regulations.

Education

Ingeniería en Sistemas Computacionales

Universidad del Valle de México

2000 - 2004
