## Career Summary

I am an experienced and passionate professional who loves what she does. I believe in giving my best in every task and am always eager to learn more, being self-taught and hungry for knowledge. I thrive on difficult challenges, understanding that overcoming them requires discipline, love, and hard work. For me, success is the result of perseverance.

My favorite programming methodology is polymorphism, and my preferred language is JavaScript. I have five years of experience in web development and one year of experience in full stack development with JavaScript as my main language. Throughout my career, I have consistently utilized the Agile SCRUM methodology, adhering to its guidelines and best practices. I am proficient in ReactJS libraries and the Angular 10 framework. I have worked with numerous libraries in ReactJS and enjoy applying UI/UX principles to create comprehensive web mockups. Additionally, I have a keen interest in programming and artificial intelligence, always looking for opportunities to integrate these fields into my work.
