Developed the front end of a custom-made CMS platform with HTML5, CSS3 (Less) and Javascript applying the MVC pattern (Ember.js) . Handled the basic management and querying of NoSQL databases, such as MongoDB for application analytics and Redis for cache and search engine. Customize services and make integration with client to bring all the necessary information. Kick-off engineering team for Rappi application where use NodeJs and Socket.io to real-time communication, and ExpressJs for REST API.

Technologies: HTML5, CSS3, JavaScript, Ember.js, PHP, NodeJS, Laravel, NoSQL, MongoDB, Redis, socket.io, express.

COURSES & TRAININGS

Udacity

Nutanix Hybrid Cloud

edX

HTML5 Apps and Games, 2018

Coursera

HTML, CSS and JavaScript for Web Developers, 2017

Server-Side Development with Node.js, 2017

Responsive Web Design, 2017

Objectives of Objective-C App Development, 2017

Multiplatform Mobile App Development with Web Technologies, 2016

Front-End Web UI Frameworks and Tools, 2016

HTML, CSS and JavaScript, 2016

EDUCATION

District University Francisco José de Caldas
Specialization in Software Engineering
2019

District University Francisco José de Caldas
Bachelor's Degree in Systems Engineering
2015

SKILLS

- HTML5
- CSS3
- Sass
- Less
- JavaScript
- React
- Vue.js
- RamdaJS
- webpack
- Angular
- NextJS
- Vuex
- Redux
- Redux Saga
- Ember.js
- Node.js
- Express
- gulp.js
- React Testing Library
- Jest
- Git
- SVN
- Responsive Design
- Jira
- MVC Pattern
- Agile
- Scrum
- PHP
- Laravel

- MySQL
- SQL
- Server
- Oracle Database
- Java
- Python
- MongoDB
- Redis
- Cordova
- React Native
- Clojure
- Scala
- TDD
- DDD
- Top-Down Design
- Jenkins
- CI/CD
