

## Diego Felipe Ramirez Salamanca

---

### Career Summary

Experienced Java Developer with over 7 years of expertise in Java, Spring, and AWS. Proven track record in designing and delivering scalable software solutions. Strong command of object-oriented programming principles and design patterns. Skills in leading teams, analysis, and resolution of logical problems, ability to analyze requirements, estimate the effort required to solve it and clarify the definition of done.

### Summary of Qualifications

Proficient In:

- |               |          |                 |                   |
|---------------|----------|-----------------|-------------------|
| • Java        | • SQL    | • Jenkins       | • CI/CD           |
| • Spring boot | • Docker | • Scrum         | • Kubernetes      |
| • AWS         | • REST   | • Microservices | • Design Patterns |

### Languages

- Spanish (native speaker)
- English (Advanced)

### Career History

#### Globant, Bogota, Colombia

June 2019 – To present

Java developer SR

- Developed and maintained Java-based web applications using Spring Boot and AWS. Collaborated with a team of developers to design, implement, and test new features. Successfully delivered several projects using Java 11, Spring Boot, AWS, Kubernetes, and Docker.
- Implemented RESTful APIs and web services, facilitating seamless communication between different systems and applications.
- Actively participated in code reviews, offering constructive feedback and ensuring adherence to best practices for maintainable and scalable codebase.
- Developed and deployed microservices, creating a highly scalable and modular architecture that allowed for independent development, deployment, and scaling of services.
- Implemented multi-threading and concurrency techniques in Java applications, optimizing performance and enabling efficient utilization of system resources.

Java Developer SSR

- Develop cloud-based applications using AWS.
- Data categorization and data set preparation using Java, Scala, and Spark
- Collaborated with stakeholders to analyze business requirements and translate them into technical specifications, delivering solutions that aligned with organizational goals.

#### IBM, Bogota, Colombia

August 2017 – June 2019

Java Application Developer

- Designing and developing a payment portal for banking clients with Angular and Spring Boot.
- Contributed to the implementation of RESTful APIs and database integrations for Java microservices.
- Develop, configure and support integration solutions for the banking sector using the tools IBM Integration Designer and IBM WebSphere Integration BUS v8 / v10 consuming and building Web Services.

**Unión Soluciones Sistemas de Informacion, Bogotá, Colombia**

March 2017 – July 2017

Junior Engineer Software Developer

- Development and support for web applications based on JavaEE, with a focus on human resources.
- Collaborated with the testing team to identify and fix software defects, actively participating in the software testing and debugging processes.
- Assisted in documenting technical specifications, system architecture, and user guides to ensure clear and comprehensive documentation for future reference.

**Education**

**Pontificia Universidad Javeriana**, Bogotá, Colombia

January 2013 – December 2016

BS, Systems Engineering
