- Constantly Updated - Utilizing the latest tools with best practices, techniques, and a fast-learning curve.
- Experience in Large Enterprise Environments - Version management, Git, GitHub, AWS, Azure DevOps, Jira, Scrum, Linux, Lighthouse, Firebase, Notion, Redux, Material UI, Docker, Webpack, Sonar Lint, GoDaddy, GitHub Pages, SQL, NoSQL, Agile methodologies, SaaS, Cloud, Problem-solving.
- Committed to Security - OWASP ZAP, Snyk, SonarQube, SecurityHeaders, Vitest, Jest, Testing Library.

EXPERIENCE

GML Software, Remote • Senior Fullstack developer

(12/2024) – Present

- I am working on a project with an estimated duration of three months.
- It's an artificial intelligence project where I use **JavaScript/TS** technologies daily with **NextJs** and **Express**, deploying on **Supabase**, **Docker**, and working with multiple APIs such as Facebook, WhatsApp, OpenAI, and Google Maps.
- Introducing new functions in design, backend, frontend, infrastructure, security, and AI.
- Working on high-quality problem-solving.

inteia, Remote • Frontend Engineer

(04/2023) – (11-2024)

- Led the Web Frontend for multiple products using **JavaScript** and **TypeScript**, optimizing the **back office**, **landing pages**, and **application architecture**, mainly **SPAs**.
- Implemented **Figma/Adobe XD** designs created by the UX/UI team.
- Aligned products with **WCAG 2** guidelines to ensure excellent **accessibility**.
- Implemented the complete **CI/CD pipeline** for Frontend services in **Azure DevOps**.
- Strengthened authentication flows in collaboration with the **backend team**.
- Maintain and support products with both legacy and cutting-edge technology versions.
- Used security tools like **SonarQube**, **Snyk**, and **OWASP** to eliminate 100% of detected security issues.
- Work within the **Scrum framework**, focusing on high-quality problem-solving.

Millicom International, Hybrid • Tech Lead

(10/2020) - (02/2023)

- Technical Lead responsible for overseeing the FrontEnd development of the company's internal platforms, both web and mobile, defining scope, assessing risks, estimating timeframes, and determining tasks.
