Summary

Hi, I'm Erik and I'm a Front End developer.

Professionally focussed on Angular (with RxJs) using Redux (NgRx in Angular's case), I also like to use Vue in my side projects Front end with Node and Express in the backend.

Considering learning as a long-life path I'm always open to learning new things from BE as Nest Framework or other programming languages.

Experience

Frontend Developer

Zyte

May 2022 - Present (1 year 3 months)

As a member of the Front End Platform Team, I am responsible for implementing features that facilitate efficient and user-friendly handling of the company's products using Angular. Creating high-performing desktop applications that leverage API integration to display dynamic data.

Functions :

- Front-end Angular development with API integration for diverse products, ensuring dynamic data handling.
- Applying the latest UI design principles to deliver the best user experience while ensuring performant code.
- Implementing new features, conducting code reviews, and adhering to best practices.
- Collaborating on implementing new features for the marketing headless CMS using Next.js.

Tech Stack :

- Angular (14 version)
- Jest and Angular Testing Library
- Typescript,
- RxJs,
- NgRx (Redux)
- Sass.

Frontend Developer

CREALOGIX

May 2020 - May 2022 (2 years 1 month)

Implement bank apps for Retail and Corporate customers. Each project involved mobile and desktop platforms where customers could make transfers, credit card payments, supervise accounts, debts, etc. At first, I was in the retail customer's project. Still, in August 2020 I moved to the Corporate project

to develop the features needed by corporate users such as international transfers, payrolls, bulk payments, etc.

Functions :

- Develop Mobile and Desktop FE features, incorporating API integration for diverse products.
- Supervise FE Team's merge requests to the main branch assuring code quality and best practices.
- Technical support to other team members.
- Deploy the app to production (Generation of IPAs and APKs with Jenkins), implementing CI/CD.

Tech Stack :

- Angular (12 version)
- Typescript,
- RxJs,
- NgRx (Redux)
- Sass.

IT Manager and Product Manager

Tarjetines SL

Mar 2011 - Oct 2019 (8 years 8 months)

Led the end-to-end creation and delivery of captivating greeting cards, ensuring a seamless production process and timely distribution to selling points.

Supervised and actively contributed to the development of the company's e-commerce platform, overseeing product strategy and collaborating closely with the development team to ensure successful implementation.

- From 2018 to the latest 2019 I managed the new company's e-commerce site project (www.tarjetinesparafloristerias.com) with the aim to replace www.tarjetines.com.
Main tech Stack used as a Frontend: Angular, Typescript, PHP, Html, and SCSS.

- From 2011 to 2018 I was in charge of the company's website project (www.tarjetines.com).
Main Stack used: Javascript, HTML, CSS, and PHP.

Other digital channels :

- Creating and developing from scratch new sales channels, e-mail marketing, and social media.

Product Manager

Tarjetines SL

Sep 2004 - Mar 2011 (6 years 7 months)

- New Product development.
- Supply chain Management.
- In addition to coordinating the external production process, I also was in charge of logistics and warehouse management.

Education
