PROFILE

As a software developer, I am constantly seeking opportunities to learn and explore new technologies. With over six years of experience in programming, primarily in JVM languages, I have honed my skills in developing robust and scalable software solutions.

My expertise extends to Reactives Architectures and Microservices, where I have demonstrated my ability to design and implement innovative solutions that meet the demands of modern-day software development. My passion for staying at the forefront of emerging technologies has allowed me to successfully navigate complex challenges and deliver quality results.

EDUCATION

INGENIERIA DE SISTEMAS Y COMPUTACION

Universidad Pedagógica y Tecnológica de Colombia | 2011 - 2017

ESPECIALIZACIÓN EN BASES DE DATOS

Universidad Pedagógica y Tecnológica de Colombia | 2016 - 2017

EXPERIENCE

SOFTWARE DEVELOPER

Intertec/Cox | June 2022 - Current

Language: Java 11

Cloud: AWS

Technologies: Gradle, Terraform, Github actions, Java, Kotlin, Spring, Kafka,

Architecture: Deploy infrastructure using CI/CD tools

Responsibilities:

- Create tech design for new features.
- Develop new features.
- Review PRs
- Maintain developed features.

SOFTWARE ENGINEER

ADDI | Bogota (Colombia) | July 2021 - June 2022

Language: Java 11

Cloud: AWS

Technologies: Reactor, Vertx, Gradle, Kafka

Architecture: Microservices using CQRS and Event Sourcing pattern with ports and adapters architecture

Responsibilities:

- Create tech design for new features.
- Develop new features.
- Review PRs
- Maintain developed features.
- Mentorship to new joiners or developers with less experience.
- On call rotation.

JAVA DEVELOPER / TECH LEAD

Bank LuloBank | Bogota (Colombia) | October 2019 - July 2021

Languages: Java, Python, Javascript

Cloud: AWS

Technologies: Spring webflux, Gradle, Reactor Architecture: Microservices with Ports and Adapters

Responsibilities:

- Develop new features.
- Help to improve code quality by doing refactoring.
- Review PRs.
- Mentorship to developers with less experience.
- Create new libraries to improve microservices.
- Create user histories.
- Do interviews to candidates for Java roles.
- Create proves of concept before implement new technologie.

DEVELOPER EDGE SENIOR

Banco de Occidente | Bogota (Colombia) | September 2018 - October 2019

Languages: Java, Python, Javascript

Cloud: AWS

Technologies: AWS Lambdas, Dynamo, Gradle, Reactor, Circle CI

Architecture: Serverless

Responsibilities:

- Develop new features.
- Design internals tools.
- Develop Lambdas in Java, Python and Javascript.
- Create and deploy infra with Circle CI

DEVELOPER SEMI SENIOR

Jaime Torres C & CIA | Bogota (Colombia) | November 2017 - September 2018

Languages: Java, Javascript

Technologies: JSP, JSF, Ionic

Architecture: Monolithic

Responsibilities:

- Develop new features.
- Maintain Legacy code
- Maintain Mobile application

MIGRATION DEVELOPER

Republic Nacional Bank | Bogota (Colombia) | May 2017 - November 2017

Languages: Perl and Java

Responsibilities:

- Develop Scripts to convert Image to PDF.

DEVELOPER

Stefanini Sysman | Bogota (Colombia) | January 2017 - May 2017

Languages: Java

Technologies: JSP and JSF

Architecture: Monolithic

Responsibilities:

- Create new features.
- Maintain Legacy code

DEVELOPER

Greco | Bogota (Colombia) | September 2016 - January 2017

Languages: Visual Basic

Architecture: Monolithic

Responsibilities:

- Create new features.
- Maintain Legacy code
