WORK EXPERIENCE

Fullstack developer Monnet payment solutions

05/2022 - Present

Fintech company from Lima, Peru

Description:

- Second time working for a fintech company and with the cloud provider AWS. Both front end and back end related tasks (Angular and Java). At the beginning team had no front end specialist so we had to get use to working with Angular fast. Currently the team has grown and we now have a front end team.

Backend developer CFG Partners

11/2021 - 05/2022

Fintech company from Puerto Rico

Description:

- First time working for a fintech company. Tasks mainly related to their web application for personal credits, loans, insurances, etc. First time working with another cloud provider, AWS.

Backend developer Experta insurance company

05/2021 - 10/2021

Description:

- Maintenance for the company's web application responsible for managing the creation, cancellation, and modifications of insurance plans offered (auto insurance, personal insurance, home insurance, etc.). This included creating and exporting files (Excel, PDF, CSV).

Backend developer Globant

10/2020 - 04/2021

Description:

- Designing and creating web services for a big retail company in Chile (Falabella), to handle and store their data from across the other products like web and/or mobile applications. First time working with a cloud provider (Google's GCP). First time implementing and working with RESTful architecture

Backend developer Claro

02/2020 - 09/2020

Telephone company from Argentina

Description:

- Maintenance for telephone company Claro, web applications and other related services like chat bots.
