Hard Skills

EXECUTIVE SUMMARY

Experienced analyst and developer with knowledge in Java, Python, and Node.js, among others. I have solid experience in software analysis, development, and implementation, with skills in managing clusters with OpenShift for over two years. Expert in collaborating with multidisciplinary teams to design, develop, and implement innovative software solutions that enhance business efficiency.

WORK EXPERIENCE

02/2022 – Current

Bogotá

OpenShift
Kubernetes
SSO & 3Scale
Docker
Java
Spring Boot
Python
Flask
NestJS
MongoDB
Shell Script
SQL Developer
Git
GO

Developer
Global Hitss

At Global Hitss, I have had the opportunity to work in various areas and roles, including as an Analyst in the User Acceptance Testing (UAT) area, Product Owner, and finally, OpenShift Cluster Administrator. In this last role, I have concentrated most of my experience at the company, focusing on the analysis and automation of OpenShift cluster management processes in conjunction with RedHat SSO and 3Scale, using programming languages such as Python, NodeJS, and Shell scripting, as well as technologies like Docker, Podman, and Kubernetes.

Responsibilities:

- Administration of the OpenShift cluster.
- Analysis and implementation of deployment requirements.
- Development of applications for the automation of cluster management processes.

01/2022 – 02/2022

Bogotá

Java
Maven
Prime Faces
Git
Spring Boot
SQL Developer

Development Engineer
Novatec Solutions Ltda.

As the QA Analyst for the Inspira project, my specific focus was on executing tests in the User Acceptance Testing (UAT) environment. My role involved working closely with the development team to ensure that all code changes were rigorously tested and met the required quality standards. Through my work in UAT, I was able to identify and report defects early in the development process, helping to minimize issues during production releases.

Responsibilities:

- Error analysis in code.
- Defect management according to user requirements in UAT.
- Implementation of code solutions.

09/2019 – 10/2021

Bogotá

Java
Spring Boot
JSF
Python
Flask
SQL Developer
Git

Developer

J. C. R. Constructions S. A. S.

I was responsible for working on a project focused on human resources management. In this project, I utilized a variety of technologies, including Java, SQL Developer, and JavaServer Faces (JSF), and occasionally Python with Flask, to develop a system that could efficiently manage employee information, payroll, and benefits.

Responsibilities:

- Process automation
- Desktop application developer using Java
- Implementation of solutions

EDUCATION

2019 – actualidad
(último semestre)

Systems Engineering

EAN University

2016

Mechanical Products Machining Technician

SENA

2016

High School Graduate with Emphasis in Technical Studies

CEDID Guillermo Cano Isaza, SENA
