

# Francisco Gomez

---

## SENIOR FRONTEND ENGINEER

Frontend Engineer with a strong track record in crafting web experiences and proficiency in technologies like Angular, JavaScript, TypeScript, ReactJS, and NextJS. I thrive on creating high-performance user interfaces, and my commitment to continuous learning and problem-solving ensures I stay at the main technologies of industry trends. I'm a collaborative team player with a passion for delivering exceptional work results.

---

## KEY COMPETENCIES

Angular	ReactJS	NodeJS
Javascript	NextJS	Docker
Typescript	StencilJS	Git

---

## PROFESSIONAL EXPERIENCE

### Senior Front-end Developer dexFreight

2019-present

- Developed a custom RegExp script to automate the translation process, resulting in a two-month reduction in manual work. The tool improved efficiency and accuracy, freeing up resources for other critical tasks.
- Optimized deployment process for faster iteration and increased productivity.
- Optimized bundle size, reducing build time in pipeline by 2 minutes.
- Designed a system that reuses markers, maps, and routes references, reducing the number of requests to the Google Maps API.
- By implementing Lazy Loading and Custom Preload Strategies, I enhanced the initial load time of the application by 20%

Tech Stack: Angular v10, Angular Material, Typescript, RxJS, Web Components, Docker, Pipelines

---

## FREELANCER PROJECTS

### Front-end Developer

2022-2022

#### Hospital Universidad del Norte

- Designed and implemented an architecture for components that is reusable and easy to maintain
- Developed a system to efficiently handle responses and error messages.

Tech Stack: Nextjs, Material UI, Typescript, Styled-Components, Recharts

### Front-end Developer

2021-2022

#### Sensomatic

- Developed a dashboard using Chart.js to display information from various machines.
- Created a map module that allows users to manage their trucks, actions, routes, and main routes.

Tech Stack: Angular v10, Angular Material, Rxjs, Chartjs, Typescript
