Summary

I am a Web Developer with 4 years of experience working mostly on ASP.NET MVC 5 at a company called Fac Consultores y Asesores. This company has a web page which is a system that helps with the internal management of information and documentation on security companies.

I am a quick learner, confident in my capabilities and experience, great team worker who is open to what everyone has to say and always tries to contribute something useful to the discussion.

I want to expand my knowledge in programming and my working experience with new and exciting working environments. I want to be in places where I can show the full extent of my capabilities and grow more because of that.

Currently studying Systems Engineering at Corporación Universitaria Minuto de Dios
