## **LASTEST WORK EXPERIENCE**

**(2022/09/01 – Present)**

### **Independent Software Developer**

Responsibilities:

- Developing integration applications for BizTalk Server using .NET and XSLT transformation templates.
- Creating full-stack Symfony applications using Angular 2+, Node.js, and React.js.
- Automating tasks with PowerShell scripts.

Achievements:

- Successfully delivered integration solutions for BizTalk Server, enhancing data flow and efficiency.
- Developed scalable and robust Symfony applications, meeting client requirements and exceeding expectations.
- Implemented automation processes using PowerShell scripts, streamlining workflows, and improving productivity.

**(2019/12/23 – 2022/08/31)**

### **Austin Software (Austin TX): .NET Software Developer**

Responsibilities:

- Developed and maintained web applications using Vue.js, Laravel, Ruby on Rails, and React.js.
- Contributed to architectural discussions and feature design in projects.
- Implemented Python scripts to automate development tasks and enhance team efficiency.
- Collaborated with data team to integrate and visualize data using Google Data Studio and BigQuery on Google Cloud Platform.

Achievements:

- Led successful development of key features in major projects, contributing to application growth and improvement.
- Implemented Python scripting solutions that significantly reduced delivery times and improved code quality.
- Collaborated closely with business and data teams to create custom reports and dashboards, providing valuable insights for strategic decision-making.
