City: Alicante
Nationality: Spanish

PROFILE

An entrepreneurial, enthusiastic and creative person. I like to be constantly learning and **facing new challenges**. Bringing my entrepreneur spirit into coding, I am passionate about taking part in a full project life cycle, from initial decision making until its delivery. As a **GDG organizer** and **WTM ambassador**, I am also involved in initiatives to support and empower women in technology.

EDUCATION AND TRAINING

- 2011- 2016: **Degree in Multimedia Engineering**, Polytechnic University College of the University of Alicante (Spain).
- 2014- May 2015: **Bachelor of Engineering in Software Engineering**, Athlone Institute of Technology (Ireland).

WORK EXPERIENCE

June 2020 – Currently: **Software Developer** at **Olympic Channel Services**

- **Projects and working methodologies:** I have been working on the development of several sections of the Olympics.com page, such as Past Olympic Games, Topic Pages, News or Future Olympic Games. Mostly, we have been following scrum methodology, except during some periods that we have followed Kanban.
- **Technologies and tools used:** react, styled components, next, typescript, graphql, jest, storybook, Lit.
- **Tasks:** more focus on frontend tasks but moving to a more fullstack profile: working on node + expressjs, as well as with pipelines, reviewing some inconsistencies on data or some basic configurations in AWS.

August 2018 – June 2020: **Software Developer** at **Eventbrite**

- **R&D department:** experience in full project life cycle, developing projects from scratch.
Technologies used: mostly **React** and **Redux**. I have been also familiar with other technologies like Blockchain, specifically Hyperledger.
Working methodologies: in addition to programming, a very important part was to be **creative** and **having new ideas** to bring to the ticketing market. Using **design sprint** methodology allowed us to be part of the product decisions and creative process together with the designers and product

manager. The work dynamic was validate and iterate quickly on an idea until reaching a MVP. Every project normally lasted around three months.

- **Music department:** working in the reporting part for allowing organizers to export data about ticket sales.
 - o Maintenance old report systems: Mako and marionette.
 - o Development of a new reporting system: **react and redux**. Use of **jest** and **enzyme** for testing, and some important libraries such as **lodash**.
 - o Development of a new **design system**: working with **storybook** and **react testing library** for testing purposes. Moreover, we also use **TDD**. Basic experience with **css**, **sass** and **flex**. **Typescript**.
- Ambassador in Villena's office for **Women In Software Engineer**, initiative to give visibility to women in tech, and **Briteimpact**, social initiative to help disadvantaged people.
- During my full experience in Eventbrite, we have been working with **Scrum methodology** (story mapping, sprint planning, poker planning, technical breakdown, working agreements). Also, I have been working so closely with the product and design team. In addition, following good practices and code reviews are crucial in Eventbrite, which has remarkably helped me improving my code quality. Finally, I have worked with people from different backgrounds and time zones.

November 2016 – July 2018: **Centers Developer** at **everis**.

- November 2016 – April 2018: BPM application developer with **Javascript** and **IBM BPM** for Caixa Bank.
- April 2018 – July 2018: implementation of the online banking website for the British bank TSB after being acquired by Sabadell Bank. I was using **AngularJS** (v1.4.8) and **git** with **bitbucket** and **sourcetree** for the version control.

July 2015 – February 2016: **Junior programmer at gtt** (Gestión Tributaria Territorial). Development and maintenance of **SIT** (Sistema de Información Tributaria) for the Valencia town hall using **Javascript**, **ASP**, **PL/SQL**.

July 2014 – September 2014: **Internships at MedBravo** – I worked with Aurelia Bustos, a benchmark in my personal and professional development, who was awarded in 2019 with the Order of Civil Merit. During this internship I was working in the **Linkedin Integration** with **Groovy** and **Grails** for MedBravo website.

COMPLEMENTARY EDUCATION

2016: Participation in Explorer, programme for young entrepreneurs sponsored by Banco Santander.

2015: First Certificate in English (B2 level) provided by Cambridge English.

2013: Course "English B1 +2" at International Language Centre of the University of Alicante.

2013: English Course (level GV2), at Global Village English Centres of Toronto, Canada, (4 weeks).

ACCOMPLISHMENTS

2018: One of the ten finalist of around a thousand people for **Imagine Silicon Valley** (<https://www.youtube.com/watch?v=Lrl2QkDrCZ0>)

2017: One of the five finalist of **everis Europe** in Pitch2Market.

2017: Participation in **SCIENT Entrepreneurship Academy and Business Competition** held at European University Cyprus.

2017: First prize winner of Awards Everis for social entrepreneurship. This prize gave me the opportunity of being a week in Tokyo presenting my project **Proojec** in **NTT Data**.

PROJECTS

January 2016 – May 2018: Founder of **Proojec** (www.proojec.com). Proojec is a website that takes advantage of the youngest and more innovative ideas to meet business development needs through thesis.

VOLUNTEER EXPERIENCE

- **GDG Alicante:** Co Organizer of Google Developer Group Alicante.
- **WTM ambassador:** I led the organization of the successful Women Techmakers Alicante during 2018 and 2019. (<https://wtmalicante.github.io/>).
- Volunteer at **India Care Puducherry**.

LANGUAGES

SPANISH Native

ENGLISH B2 level (Common European Framework of Reference).
