

JHORNAN COLINA

WORK EXPERIENCE

Remote Frontend Developer

FSB Technology - [Aug 2022](#) - Present

- **Vue Developer:** I was also working on the CMS / Back Office tool as a Vue Developer, in charge along with another team to bring the project to life and improve the tool we previously used for everything related to the CMS also **SuperBase** implemented to control requests.
- **React Developer:** As the person in charge of creating User Interface (UI) pieces for the I-Gaming world, my goal is to facilitate the betting experience in casinos through intuitive and attractive design.
- **Angular Developer:** We also worked on another type of application – Angular apps. We have been involved in numerous projects, and in this particular case, it was similar to our React apps but built using React

Remote Frontend Developer

Double Nines - [May 2021](#) - May 2022

- **Vue Developer:** Then, I worked on a project for the same company, "Whiplash," where I served as a Vue.js Developer on a Ruby-based project where the frontend was embedded within the backend.
- **Angular Developer:** I collaborated with a team on an MVP for Ryder, crafting a project centered around Atomic Components, all of which we showcased in a StoryBook.

Remote Frontend Developer

Cafeto Software - [Dec 2020](#) - Mar 2021

- **Remote Angular Developer:** I participated in a project for the American company **Assuricare**, where I held the position of Angular Developer

Remote Frontend Developer

LikeU BPO - [Jan 2020](#) - Dec 2020

- **Remote Angular Developer:** I led a project for "Leonisa," where I undertook full application architecture and handled all testing responsibilities. I served as the sole Frontend Developer on this endeavor.
- **Remove Vue Developer:** Another role in the company involved designing and creating apps to manage people using Vue.js instead of Angular.
