

# JOSIMAR SANCHEZ AGUDELO

## SENIOR DEVELOPER FULL-STACK

**Birthdate:**

14-march-1991

**Age:**

31

**Marital status:**

Free union

**Address:**

Cra44#26-71 apto 415

Bello-Antioquia

I consider myself a software developer, focused at the beginning on the general vision of the situation to understand the stakeholder and his necessity, I love zooming on the details to be sure I can give a durable, scalable, and longtime solution.

I like to learn every day about new tendencies on web development, object-oriented programming, data base and interoperability. I have more than 10 years of experience in the software development industry using different technologies such as Java EE, ESB (IBM), Javascript, Oracle Data Base, SQL Server, DevOps, and Front-end design.

I have work experience on projects related to the field of the health industry, HIS, LIS, LAS, RIS.

I am passionate to work in my soft abilities such as emotional Intelligence, leadership, financial intelligence, and using these abilities as a projects leader role.

Technical Skills	Experience (years)
Java	11
SQL Server (Transact)	11
HTML	11
CSS	11
Spring-Boot	4
AWS	3
Docker	3

## WORK EXPERIENCE

December. 2021 – Currently

**ENDAVA** Senior Developer - Medellín, Colombia

Create and maintain the REST services defined in the project to support the different types of transactions.

Implements version 2 of 3DS in the different types of transactions supported in the process. Maintain 100% of unit testing coverage using Junit5.

Build the whole dashboard and alerts environment using Splunk and Sysdig to monitor microservice healthy.

Create the performance test suite using Locust and Python, to then develop the JOB in the Jenkins pipeline request to deploy the microservice.

March. 2012 – December. 2021

**Ayudas diagnósticas SURA** Software engineer - Medellín, Colombia

Define the BD struct model in SQL Server to save the patient's clinic result.

Develop the consumption of web services exposed by Hospital information Systems using Axis libraries in java 8. Led the agile development team to build the integration between our java 8 backend to the CCM platform (customer communications management) to be able to send the clinic's patient results in emails; Developed the consumption of Rest services exposed by CCM.
