

Fabricio Filipe Viapiana

Frontend Engineer

Profile

Full-stack engineer with 7 years experience, passionate about technologies that make people's lives better. Equipped with a diverse and promising skill set. Proficient in an assortment of technologies, including Reactjs, Angular, Python, and Nodejs, but my learning focus is on Frontend. Able to effectively self-manage during independent projects, as well as collaborate in a team setting.

Employment History

Bravi Software, Florianópolis

November 2019 — Present

EposNow – 08/2021 - present

As Frontend Engineer, my assignment is to develop new features, keep bugs out and help to increase value to the products by suggesting improvements, features, mainly in the POS, Backoffice, and Kitchen display system.

Stacks:

- Reactjs + Typescript + Redux
- C#, .NET, ASP.NET
- SQL Server
- Jest, enzyme, react-testing-library

Babbel – 09/2020 to 07/2021

As a Frontend Engineer, I worked to improve the user learning experiences by creating games that help users learning their target language. I also helped the team to validate ideas for future iterations, by testing and validating MVPs. To help on our journey we used Phaser.io, a Javascript framework to help us with the abstractions related to game physics, and rendering.

Stacks:

- Reactjs + Redux
- Phaser.io
- Jest, react-testing-library

BRF – 06/2020 to 09/2020

As a Fullstack Engineer, I helped to build a platform to display employees' scores based on matches they've played on another Bravi app. Although the frontend is simpler, displaying only the data, my focus was working on the backend using Python + Django, where we needed to do all the necessary calculations to display the data in the frontend.

Stacks:

- Python + Django
- Angular 2

Details

Manoel Mariano Ferreira, 559, B 301, Biguaçu, 88161680, Brazil, +5548996553576

Skills

JavaScript

React

TypeScript

HTML5

CSS3

Redux

Angular 2+

Python

Node.js

Git

SQL

Languages

Portuguese

English

- Postgres

CIEE – 11/2019 to 05/2020

As a Fullstack Engineer, I helped to build and improve the new platform to manage companies and internships and provide a connection between them. My focus was on Frontend where we should be concerned about having a good UI for any person. Accessibility was not only a necessity but a must.

In this project, we worked with UI/UX constantly to always seek the best experience in the most effective way possible. We use Figma to help us in the development of interfaces.

Stacks:

- Java + Spring
- Angular 2
- SQL Server, Oracle

Nexti Gestão Online, São José

January 2019 — October 2019

As a Fullstack Engineer, I helped to create new features to the time clock platform system, ensuring data accuracy as well as transparency to the users. We used S3 to store reports and files, RDS for our database, and load balancer.

Stack:

- Java + Spring
- Angular 1
- AWS
- MySQL

Education

Information Systems Bachelor Degree, Universidade do Sul de Santa Catarina, Palhoça

July 2015 — December 2019

Computer Technician Course, IFSC, Florianópolis

February 2013 — August 2014

Focused on software development
