PROFILE

Master's in software engineering and systems and computer engineering, with interest in positions with technical leadership profiles and architect in companies with special emphasis on technological development. Advanced knowledge in SOA architecture and IT governance. Experience in handling different database engines (SQL and NonSQL). Development of WEB applications in business environments using different FrameWorks back end (JAVA) and front end (Angular). Technical leadership and application architecture design based on design patterns and data extraction. Leadership skills, ability to work in teams, flexibility to change, and ease of continuous self-learning.

LABORAL EXPERIENCE

EPAM Anyware Abril 2022 - current.

Technical Leader

Design and implementation of applications focused on ensuring and maintaining security in the access of SaaS applications within the provider's cloud (Atlassian).

- Generation of designs (of applications) in a serverless environment based on events.
- Generation of test plans that guarantee the quality in the steps to production automatically.
- Adaptation of new technologies to improve the security of applications.
- Outlining of security models (OAUTH2, JWT) adaptable for managing secured environments in different domains.

BlancLabs April 2020 - February 2022

Technical Leader

Design and implementation of projects for a Canadian bank back end (Java - spring boot) and front end (Angular 9).

under agile methodologies (scrum)

- Recognition as a technical leader in different projects of the company, generating trust in the client and the company.
- Management of agile methodologies to implement projects with very short delivery times, reaching more than 80% effectiveness in deliveries.
- Strengthen the relationship with the client, generating negotiation strategies regarding the scope, resources and time required for a project.

Independent October 2019 – April 2020

Consultor

I'm working as a freelance on different projects related to banking and information security; the development of back services for mobile banking applications and code review.

- Secure code validation for high-impact developments in banking entities.
- Validation of the scope of the projects.
- Architecture formulation for cloud-deployed applications (AWS).
- Metrics review to optimize the speed of development in the teams.

Globant Colombia April 2017 – September 2019
