## WORK EXPERIENCE

### Baires Dev

Aug. 2022 – Present – San Francisco, CA

*Senior Software Engineer*

- Worked developing innovative solutions for the [FlyBreeze](#) website such as landing pages, refactorings and new features.
- Refactored a good amount of code utilizing the best practices and modern standards for **Angular**, **TypeScript** and **RxJS**.
- Enhanced the after booking flow, enabling users to edit trips, see their flights information and purchase extras, resulting in improved customer satisfaction.
- Worked in the Notification Service using **Ruby on Rails**, handling emails, SMS, push notifications and everything related to notifying the user.

### Ancient Gaming

Dec. 2021 – Dec. 2022 – St Julians, Malta

*Mid-level Software Engineer*

- Worked inside Ancient Gaming, an iGaming company that owns [HypeDrop](#), [HypeUp](#) and [CSGORoll](#).
- Was responsible for the admin part of CSGORoll and HypeDrop, developing the features so the website admins could have data about transactions, users, trades and help the support team solve user's issues.

### WEX Inc.

Jun. 2021 – Aug. 2022 – Portland, ME

*Mid-level Software Engineer*

- Played a big role in the [WEX EDGE](#) Project, generating over \$30 million in savings for clients through savings in hotel room booking, auto parts, and gas purchasing.
- Developed scalable solutions for a user base exceeding 10,000, utilizing **Angular** and **TypeScript**.
- Successfully integrated WEX EDGE with AutoZone, streamlining parts purchasing and enhancing user experience.
- Contributed to candidate assessment and selection for Software Engineer positions, **conducting interviews** and **reviewing technical assessments**.

### GFT Brasil

Sep. 2020 – Jun. 2021 – São Paulo, Brazil

*Mid-level Software Engineer*

- Worked in the revitalization of legacy systems used in bank agencies for the Santander client, utilizing modern technologies such as **Angular** and **TypeScript**.
- Introduced Unit Testing using **Karma** and **Jasmine**, ensuring code quality and reliability.

## TANTTO LTDA

Mar. 2020 – Aug. 2020 – São Paulo, Brazil

*Jr. Software Engineer*

- Single-handedly developed the front-end of a software solution which allowed users to purchase car plates for their vehicles utilizing **TypeScript** and **Angular**.
- Implemented robust Unit Testing utilizing **TypeScript**, **Karma** and **Jasmine**.
- Worked directly with the clients, understanding requirements and transforming them into tasks.

## SkyPet Soluções

Mar. 2019 – Dec. 2019 – São Paulo, Brazil

*Jr. Software Engineer*

- Designed the whole **UX** for a delivery app targeted at PetStores, leading to partnerships with 50+ stores.
- Worked in app development with **Ionic** and **Angular** for the first time, contributing to rapid project growth.

## DEKA Solutions

Feb. 2018 – Mar. 2019 – São Paulo, Brazil

*Development Intern*

- Developed internal software for a major Brazilian healthcare provider.
- Created restaurant delivery app using **HTML**, **CSS** and JavaScript.
- Collaborated on building a BackOffice solution for the restaurants using **PHP** and **Laravel**

## EDUCATION

FIAP – Faculdade de administração e informática Paulista

2023-2026

*Associate Degree in Software Analysis and Development (In Progress)*

ETEC Fernando Prestes

2016-2018

*High School Graduate & Computer Technician*
