VueJS 8/10
ReactJS 7/10
Django 7/10
NodeJS 7/10

Java Script 8/10
Python 8/10
HTML5 8/10
CSS3 8/10
GIT 7/10
SQL 5/10

Experience

Freelance Full-Stack developer 04/2022 – 09/2023 (Stack: ReactJS, Django, PostgreSQL, Material UI, NodeJS, HTML5, CSS, SASS, ES6, Postman, Docker).

- Currently developing a fashion photography page for a local client.
- Developed an Airbnb-type application for a small eco-hotel from scratch.

Front-End developer, Sites Software & Services. 02/2022 – 03/2023 (Stack: VueJS, Laravel, NodeJS, MySQL, JS, ES6, PHP, Bootstrap, Tailwind, Github).

- Developed multiple landing pages for the company site, working hand in hand with the designer and with the product owner to guarantee the delivery of the code according to the mockups.
- I provided maintenance and made multiple corrections according to the requirements of different clients: users, technical leader and product owner.
- Implemented a statistics observation system using different tables and graphs to provide some data analysis to content creators.
- Implemented multiple third party components with specific adaptation to the page requirements.
- Performed unit and integration tests to guarantee the correct functioning of the application and subsequently debugged and corrected errors as they were identified.

Front-End developer, COMODISIMOS. 12/2021 - 03/2023 (Stack: Vue.JS, ES6, HTML5, CSS3, SASS, Materialize, Laravel, PHP, Github, Vtex).

- Developed more than 15 landing pages for different products on the e-commerce site, working hand in hand with the designers and with the product owner to guarantee the delivery of the code according to the mockups.
- Developed multiple pages and functionalities for the internal and administrative management of the company.

Full-Stack developer, Industrias Falcon. 04/2020 - 07/2021 (Stack: ReactJS, Django, MySQL, ES6, Python, Github).

- Collaborated with the development and maintenance of the first version of the company's website.
- Implemented the designs and mockups provided by the designer.
- Collaborated on the development of the backend system where users could register as clients, request quotations, and follow the state of projects.
- Collaborated with the design and creation of the different elements of the database, schemas and SQL queries.
- Implemented the model 'Gitflow' for the versioning of the code.
