PROFESSIONAL PROFILE

I'm a software engineer with 8 years of experience building web and hybrid mobile applications. I'm skilled at leading teams and using agile methodologies to deliver projects on time. In 2021, I took on a lead role in a technical project, which enhanced my management and leadership skills. I'm currently studying project management to improve my ability to plan and organize projects effectively. I have experience working as a front-end engineer and foundational knowledge of servers, back-end development, and databases. I'm passionate about technology and always stay up to date with the latest trends and tools. I have English skills (C1), supported by both my studies and work experience in the United States, which has enabled me to collaborate on international projects and build strong professional relationships with teams from around the world. I'm committed to high-quality work and continually seek ways to improve and contribute to project success.
