MIGUEL ÁNGEL GUTIÉRREZ

Full Stack Software developer

I am a proactive and versatile software developer with a strong background in backend development and front-end proficiency. My adaptability ensures smooth collaboration within cross-functional teams, and my creative mindset drives innovative solutions and process improvements.

I possess a robust technical skill set and a keen business acumen. My dedication to ongoing learning and staying current with industry trends empowers me to contribute effectively to diverse projects. I am committed to achieving excellence through technical expertise and strategic thinking while maintaining a thirst for continuous improvement.

EXPERIENCE

Mid Level Leader Software Engineer - Caring Data

September 2023 - Actuality

In my role as a Full Stack Developer at Caring Data, I am entrusted with a multifaceted set of responsibilities. This includes creating and implementing new features using Laravel, Angular, and Ionic, as well as troubleshooting and rectifying software errors. Additionally, I take the lead in developing a mobile application tailored for staff members using Ionic. Beyond this, I am also responsible for optimizing various modules within the software, ensuring streamlined and efficient performance..

Mid Level Software Developer - Talent.com

December 2020 - August 2023

I enhanced talent.com's website by developing innovative features using PHP, Laravel, HTML, and managing databases like MySQL and Elasticsearch. I introduced novel ideas, demonstrated expertise in MVC architecture, and ensured code quality.

I collaborated with cross-functional teams, automating tasks through Cron jobs and scripting, streamlining processes, and maintaining a seamless user experience by resolving bugs and optimizing solutions. I consistently upheld coding best practices for scalability and maintainability.

Developer FullStack - Norton de Colombia

April 2020 - December 2020

I began my journey at Norton de Colombia as an intern, progressing into a full-time role. My role centered around Angular and Ionic technologies. Notably, I took the lead in conceptualizing and building a named 'Mi Unidad Residencial', designed for the management of residential properties. This hybrid application, optimized for both web and mobile platforms, proved to be a pivotal project. I leveraged Angular not only for the development of the app itself but also for the web application used to administer and manage this platform.
