SUMMARY

With over a decade of experience in software engineering, I've crafted applications for global enterprises. A JavaScript specialist committed to ongoing learning, ensuring top-tier performance as a software professional. I thrive on new experiences that drive personal and professional growth.

EXPERIENCE

Senior UI Developer

Huge

March 2022 - Nov 2023

- Worked for Google as a contractor in UI projects as android.com, built-in.google and wearos.google.com among other sites.
- Proposed tech and UI solutions.
- Helped to release Android web page.
- Built specific project features.
- Contributed to the improvement of the Nimble library—an advanced global state management tool for inter-component communication, developed with **TypeScript** and drawing inspiration from **React** and **Redux**.
- All projects developed with **TypeScript**, **Jinja**, **Python**, **HTML**, **CSS**, **Git** and technologies designed by Google.

Frontend developer

Zemoga

Jun 2020 - Feb 2022

- As a contractor at Morningstar, my responsibilities centered around the development, migration, support, and reconstruction of UI modules and components within a significant financial application. Coded with **Vue 2**, **Vuex** for the global state management, **NodeJS**, **Express**, **Webpack** and **Jest** for unit testing.
- Helped to support mono-repo architecture with **Lerna**.
- Deep use of **Storybook** for testing components.
- Enhanced the company's website (zemoga.com) by integrating **ReactJS** and **NextJS**, employing Server-Side Rendering (SSR) for optimal Search Engine Optimization (SEO).

Frontend Developer

Rappi

Oct 2018 - Jun 2020

- Worked as a frontend developer, providing support and enhancing new features in a web application dedicated to assisting customers, primarily utilizing **TypeScript** and the **Angular 2+** framework.
- Provided support for the main application in it's web version using **ReactJS** with **Redux**.
- Created and migrated native mobile screens to web view screens with **VueJS**.
- Provided comprehensive support, meticulously documented existing services, and innovatively crafted new ones within the internal Microservices architecture using **Node.js** and **Express**.

EDUCATION

Diploma in Systems Engineering

Universidad Nacional de Colombia

2006 - 2012

Main subjects: Mathematics and Physics, Programming Languages, Software Engineering, Operative Systems, Algorithms.

Fullstack Developer

Iam Studio

📅 mar 2017 - Jul 2018

- Contributed to several applications within a comprehensive web platform responsible for managing diverse measurement devices manufactured by a prominent international company named Emerson with **AngularJS**, **NodeJS**, **SQLite** and **git**.
 - Developed a chart-based application using **ReactJS** and **ChartJS** to assess and validate the performance of various databases, including **MongoDB** and **SQLite**. The primary objective was to test the system's capability to efficiently insert one million records within a single second.
-

Java Developer

Zemoga

📅 Oct 2015 - feb 2017

- Worked as a contractor for a US-based client (Morningstar), operating in the financial and investment sector, using **Java** and **Play framework**.
 - Built **HTML5** and **CSS3** layouts for important us client called SEARS.
 - Scrum methodologies and Working with US clients since 2015.
-

Java Developer

Global Hitss

📅 Oct 2013 - Oct 2015

- Provided support to big applications and developing requirements for a multinational client in the telecommunications area.
- Migrated PLSQL software to Java language.
- Front-end development with java server faces.
- Construction, build, and compilation with Maven and Ant.
