<https://www.linkedin.com/in/sebastian-cardona-q>

I am a software developer with almost 10 years of experience. The programming language that I have used for the last five years for most is Java, being this for me, the stronger programming language.

I have worked on different projects in both the public and private spheres always adding value. I like to take on challenges of developing new features as well as correcting and detecting bugs always trying to deliver my obligations on time. I have the best attitude and I am interested in a good work environment. I am an also enthusiastic learner of VueJs and AWS products.

## EXPERIENCE

### Implemental Systems, Development Analyst — Apr, 2012 - Dec, 2016
