

## Hello everyone!

I have over **12 years** of experience in software development, adept at tackling both **backend** and **frontend** challenges using **Angular**, **NodeJS**, and **Flutter** as my main tools. I also have many years of experience in **UI** and **UX** design ensuring seamless and engaging digital solutions.

I've had the opportunity of working on local and international projects on the private and public sector. On those, I've contributed as a member with an insatiable curiosity for learning and adopting the industry's best practices. I want to keep learning how other parts of the world create technology and how tech is expanding the boundaries of what we know and how will it change in the future.

When I'm not at the computer, I'm exploring some fantastic world on Final Fantasy XIV, keeping in touch with the artist in me through the piano, or drinking a freshly brewed coffee with my cat on my lap. 😺

## Willmer Hernández

Senior full-stack developer

Born:

Guatemala - 1995

Location:

Lima, Perú

Email:

willmer.hg@gmail.com

## Main skills

- Angular
- Node.js
- Typescript
- Flutter

## Industries

- Mental health
- Healthcare
- Agriculture
- Retail
- Asset management

## Experience

### Invgate - Remote

Senior Front-end developer | July 2024 - Present | Short Contract

Built new functionality and maintain Invgate's asset management platform. As my team's sole FE developer, it's my duty to create a seamless integration between our backend's data and the ux our many customers enjoy.

Angular 16, Node.js, Nest.js, Typescript, Karma, Docker, PostgreSQL, AWS S3, AWS EC2, Gitlab Pipelines, Sonarcube, Redis, Monolith

### ICANotes LLC - Remote

Senior Full-stack Engineer | Oct 2023 - June 2024

Created and optimized an application our clients used to create their medical documentation as well as manage their clinic and team within the platform. As a full-stack developer, I was tasked with fixing and adding new functionality to the application to meet our clients' needs without affecting their day-to-day. All this with being **HIPAA** compliant for all our data-related interfaces.

Angular 16, Node.js, Nest.js, Typescript, MongoDB, MySQL, Karma, Lambda, CloudWatch, EC2, Cognito, SES, Sonarcube, Monolith

### AmbitionProfile - Remote

Lead Software Engineer | Feb 2021 - June 2023

I planned, designed and developed an application in which users could take the psychometric tests developed by our specialists and compare their answers with set statistical norms to arrive at the scores that would better describe the respondent.

Angular 15, Cloud Functions, Firestore, MongoDB, Typescript, Node.js, Nest.js, PostgreSQL, CloudWatch, Cognito, Lambda, Microservices

### BairesDev - Remote

Angular Engineer | June 2020 - Feb 2021

My role was to create and optimize the functionality of software built to make medical studies and gather data from patients. This needed to be done with extreme care since our software was considered medical devices so data treatment, security, and best practices were enforced by the **FDA**.

Angular 12, Typescript, Karma, Cognito, CloudWatch, Lambda, Jenkins, Postman, Docker

## ● Agropecuaria Popoyán @ Proyecto Proinnova - Hybrid

Senior Software Analyst | Aug 2018 – June 2020

My role as Senior Software Analyst was to be the main engine for the development of this ecosystem. I'm responsible for coming up with the most innovative ways of helping the farmers through technology by taking business needs and translating them into visible and functional pieces of technology through mocks, design suggestions, architecture proposals, projection, and planning as well as leading the development of those features and the shipping to production environments, this while ensuring the maintainability, scalability and best experience of our solutions

Angular 10   Ionic   Node.js   PostgreSQL   PM2   Express   Flutter  
Firebase   Firestore   Cloud Functions

## ● Osigu - On-site

Senior Software Engineer | Sep 2015 – Oct 2017

In my job, I'm in charge of integration between internet-based services like APIs with layouts previously designed and built, also giving an understandable and friendly flux to the users inside the application and helping them to get information and make transactions as efficient as possible.

Angular.js   jQuery   Node.js   bootstrap

## ● Multiple companies - On-site

Junior Software Developer | Jan 2011 – Sep 2015

I have gotten the privilege to work at different companies with multiple clients and amazing people.

PHP   Wodpress   MySQL   CSS   Apache   Bootstrap   Foundation  
javascript   jQuery   SVN
