PROFESSIONAL PROFILE

I am a multidisciplinary multimedia engineer with emphasis in the development of web applications and services. My specialty is back-end programming in the stages of analysis, planning, design, implementation, deployment and maintenance of platforms for technological solutions.

I am always looking to learn something new to help me grow as a professional, I put all my dedication and effort in the results of each project I take on. I try to keep abreast of technological updates and enjoy interacting with people who have similar interests to mine.
