Andres Arredondo Hernandez

Java Developer

SUMMARY

Software Engineer with 5 years of experience and knowledge in software development working in the Information Technology area, in languages such as Java, Scala, JavaScript, and React as well as APIs, Git, and UML. My tenacious and proactive results in product development, and my goal-oriented attitude led to focus and time management efficiently, and other skills include fast learning, leadership, teamwork, problem solver, and creativity, both working as a team player as well as an individual worker. I have been involved in the different stages and functions corresponding to the software development cycle. I've found my biggest strength in the areas of analysis, design, and management, with a focus on the user's needs.
