Jose Vicente Vizcaino
Full Stack Developer

PROFESSIONAL OVERVIEW

Full stack developer with 6 years of experience working on a diverse range of projects spanning industries such as real estate, banking, e-commerce, and ERP systems. Proficient in programming languages such as Angular, Java, NodeJS, Python and JavaScript. In addition, highly experienced in configuring and maintaining cloud computing services such as Gcloud and Azure, and working with Linux: Ubuntu, Centos, and Kali Linux. Excellent team worker with important communication and leading skills.

Roles

- Software Engineer
- Full stack Developer

Solutions

- Real Estate Reporting System
- ERP System
- Apps
- Microservices and API Integration
- E-commerce Solutions and Microservices

Industries

- Real state
- Banking
- E-commerce

Technologies

- Angular
- Java
- Spring Boot
- JavaScript
- TypeScript
- Scrum
- MongoDB
- Python
- SQL
- SQL server
- Jest
- Jasmine

Key Engagements

Large Real Estate Company	Software Engineer	Responsible for the development, architecture, testing, reviewing and deployment of a front-end application. I built an application to streamline the creation of reports.
ERP Billing Company	Full stack Developer	Code review, front-end and back-end development (Java/Angular), deployment. Optimize invoicing and collections.
Large Banking Entity	Full stack Developer	Front-end and back-end development. Improved data collection, customer, and transaction queries.

Education

Systems Analyst, Icsa Barranquilla, 2013

Professional Training/Certifications

Angular / NodeJS / Bootstrap, Platzi, 2018
Spring boot / Python / Java, Udemy, 2014
Cyber security analysis, Backtrack Academy, 2014

Geographic locale

Bogota, Colombia

Professional and Business Experience

Allied Global   **April 2023 – Currently**
Software Engineer

Responsibilities:

- Applied strategic architectural design principles to enhance the performance and user experience of the real estate reporting system's front-end application, resulting in an optimized and intuitive interface.
- Led the comprehensive development lifecycle, from architectural planning and testing to iterative revision and successful deployment of a front-end application for a cutting-edge real estate reporting system.
- Incorporated advanced technologies, including Angular, CkEditor, and AWS, to ensure the delivery of a highly functional and dynamic front-end application.
- Proactively addressed challenges throughout the development cycle, engaging in iterative refinement to continuously enhance the application's features and user interface for optimal performance and user satisfaction.

Business/Technology Value

- Implemented robust testing strategies to guarantee the reliability and functionality of the front-end application, overseeing the testing process and ensuring the delivery of a high-quality product.
- Collaborated with cross-functional teams to ensure seamless integration between front-end and back-end components, facilitating efficient project execution while meeting stringent deadlines and budgetary constraints.

Global Talent Hunting   **November 2022 – March 2023**
Java Developer

Responsibilities:

- Conducted the end-to-end development, architecture, testing, and deployment of an ERP system using cutting-edge technologies such as Java, Spring Boot, React.js, Mongo DB, and Sonar.
- Optimized database performance within the ERP system, ensuring seamless and efficient data management.
- Drove the development of new and innovative features within the ERP system, contributing to its continuous improvement and relevance.
- Acted as a go-to expert for identifying and resolving bugs promptly, ensuring a robust and error-free ERP system.

Business/Technology Value

- Managed the strategic deployment process, guaranteeing the smooth and effective rollout of ERP updates and enhancements.
- Played a crucial role in maintaining code quality by conducting thorough code reviews, adhering to best practices, and implementing quality assurance measures.

Jundry Software Solutions   **January 2021 –November 2022**
Full stack Developer

Responsibilities:

- Led end-to-end development of applications, microservices, and API integrations, utilizing a diverse tech stack including MySQL, Spring Boot, Angular, Ionic, React, PostgreSQL, MongoDB, Unit, Mockito, JWT, AS400, SQL Server, Oracle, PL/SQL, and Hibernate.
- Demonstrated proficiency in both front-end and back-end development using Java and Angular, showcasing a comprehensive understanding of the full technology stack.
- Managed the deployment process for applications and microservices, ensuring seamless integration and functionality across various   platforms.

- Provided mentorship to team members, fostering a collaborative environment for skill development and knowledge transfer within the team.

Business Technology Value:
- Conducted thorough code reviews, ensuring adherence to coding standards, and best practices, and implementing rigorous quality assurance measures.

DevSoftCol   **January 2020 – January 2021**
Full stack Developer

Responsibilities:
- Took part in the development of e-commerce platforms, applications, and microservices using a diverse tech stack including MySQL, Spring Boot, Angular, Ionic, React, PostgreSQL, MongoDB, Unit, Mockito, JWT, Hibernate, and AWS.
- Implemented robust testing strategies to ensure the reliability and functionality of features, contributing to overall quality and user satisfaction.
- Took an important role in developing new and innovative features, enhancing the functionality and user experience of e-commerce platforms and applications.
- Provided valuable support to the team, fostering a collaborative environment, and contributing to the collective success ofprojects.

MultiAlliance   **February 2018 – January 2020**
Software Developer

Responsibilities:
- Implemented comprehensive testing strategies using technologies such as JUnit, Mockito, and others to ensure the reliability and quality of software components.
- Played a key role in developing new and advanced features, contributing to the enhancement and innovation of software solutions.
- Utilized Python for the development of automation scripts, data processing tasks, and backend services, streamlining workflows and improving operational efficiency.
- Leveraged Python libraries and frameworks to enhance application functionality and performance, ensuring seamless integration with other systems and services.
