Career Summary

Software Engineer with +8 years of experience in the IT industry involved throughout the software development life cycle (the planning phase, prototyping, data modeling, implementation, testing and maintenance) of web applications, participating in tasks related to collecting requirements from several stakeholders such as customers, internal and external experts, and managers to create a software requirement specification document, validating the solutions and implementing them by using Agile methodologies such as SCRUM, taking advantage of the SCRUM Master Certification completed in 2018.

Career History

Solvo SAS

February 2022– Still

Full Stack Developer (.NET Core, Angular, Vuejs)

Implementing new features and applying improvements on existing systems through APIs and participating in design and coding for User Interfaces for various web-based Professional Employer Organization software.

Leading by example is being my motto in this development team where the transfer of knowledge is a challenge on a daily basis, expending time to mentor new team members, talking to all the team members to provide and receive technical details and participating in the conversations to identify the root cause and technical solutions when the gl reporting team (external from the development team) inform about unexpected behaviors reported by the final users.

Globant, Sistemas de Colombia SAS

May 2021– February 2022

.NET Developer

Coding software requirement required to accomplish APIs and Integrations needed on a Financial Web based system, exposing the final core system through secured apis for internal and external applications. The challenge in this development team was to acquire the technical expertise to keep a conversation with senior software developers, and overcome time restrictions for them to share their knowledge, by using the agile mentality on a daily basis communication where every task was the opportunity to collect the puzzle pieces from the business logic and about software architecture.

CTI Consulting Bogotá, Colombia

July 2020 – April 2021

Web Software Developer & Scrum Master (Net core, kotlin, angular 2+)

Implement development required to accomplish technical plans for maintaining multiple products based on projects assigned.

I was delegated by the team leader in some project to coordinate the agile process with the development team members to apply SCRUM guidelines in the development life cycle.

Blackboard Bogotá, Colombia

Feb. 2019 – June 2020

Web Software Developer (Angularjs, reactjs)

Participate in requirement analysis to elaborate technical plans, code to accomplish technical plans for maintaining Ultra Experience core product, contribute actively to writing unit tests, e2e tests to guarantee the expected behavior on every single development.

The scrum methodology in here was used in a consistent way in regards with planning capacities for the team members in the execution of the tasks, and by using the retrospective and review meetings for talking and proving the team member ideas to look for efficiency when understanding the requirements and coding.

AOS Bogotá, Colombia

July 2018 – January 2019

Web Software Developer

Review and specify architectural diagrams for maintaining web applications

Handle communications with scrum development team as a member to ensure a proper requirement analysis. Develop web applications to generate customized reports.
