ABOUT

I am a software engineer specialized in frontend. With deep expertise with StencilJS, Angular, Typescript, Jest, HTML, and CSS.

WORK EXPERIENCE

Fourthline   May 2020 — Present
Senior Frontend Engineer

Leading the WebSDK team

- Architected a web SDK from the ground up, to be consumed by partners
- Based on WebComponents using StencilJS
- Implemented client side image recognition & face detection
- Customizable, themeable, fast, lightweight, app-like experience

Developing the public website.

- Architected Angular frontend with SSR
- Close to 100% unit tested with Jest
- Fully integrated with external headless CMS

Other tasks

- Performed more than 50 technical interviews
- Responsible for onboarding new members of the team
- Mentored other engineers on my areas of expertise
- I am the person to come to when there is a user conversion issue in order to fix it fast

Place to Plug   May 2018 — May 2020
Frontend Engineer

Developing and maintaining Place to Plug frontends.

- Built 5 different Angular application from the ground up
- Public website, backoffice, blog, translations platform, authentication platform
- Responsible for most of the UI/UX
- Built a shared library of components to share between the frontends
- SEO and social sharing optimization
- GraphQL integration with real time APIs

Place to Plug   Apr 2017 — May 2018
Full Stack Engineer

Developing Place to Plug APIs.

- Building the new stack from the ground up based on Node.js microservices
- API Gateways based on GraphQL
- Public site using Angular
