SKILLS SUMMARY

- **Frontend Technologies**: JavaScript, TypeScript, React, Next.js, Angular, HTML5, CSS3.
- **Backend Technologies**: Node.js, Express.js
- **State Management**: Redux, React Query
- **Testing**: Jest, Enzyme, React Testing Library
- **Design Tools**: Figma, Adobe Photoshop, Sketch.
- **Development Tools**: GitHub, Github, Gitlab, Bitbucket, Docker, Webpack, Vite.
- **Databases**: MySQL, MariaDB.
- **Web Technologies**: Web APIs, RESTful API.

PROFESSIONAL EXPERIENCE

Gorilla Logic – March 2022 to Present
Role: Frontend Developer

- Developed and maintained Angular components, ensuring high functionality and reusability across multiple projects.
- Solved UI/UX issues to enhance the mobile responsiveness of the websites, improving the overall user experience.
- Styled responsive landing pages and interfaces using CSS, SASS, and frameworks such as Material Design and Tailwind, adhering to branding guidelines.

- Conducted extensive cross-browser and cross-device testing to ensure consistent performance and user experience.
- Performed accessibility testing using a range of tools, including screen readers and developer tools like AXE, to ensure compliance with accessibility standards.

Role: Senior Web Developer
- Developed dynamic landing pages and WebViews using React, managing state efficiently through Redux to ensure seamless user interactions.
- Migrated JavaScript components to TypeScript to improve maintainability, scalability, and type safety across the application.
- Collaborated closely with the design team to implement responsive landing pages and WebViews, ensuring they adhered to provided Figma designs and brand guidelines.
- Wrote and executed comprehensive unit tests with Jest, Enzyme, and React Testing Library, achieving 100% code coverage to ensure high-quality, bug-free code.
- Integrated CMS content into landing pages, optimizing the user experience through dynamic content management and improved content delivery with Next.js.
- Styled components and landing pages using CSS and SASS, ensuring design consistency across all platforms and meeting the project's design specifications.
- Conducted cross-browser and cross-device testing to ensure the application was fully responsive and functioned smoothly on a variety of devices and screen sizes.

Summer – October 2021 to March 2022
Role: Frontend Developer
- Designed and implemented reusable React components for product listings, search filters, and payment forms.
- Implemented SSR with Next.js to enhance page load speed and SEO, ensuring eCommerce content is search-engine friendly.
- Developing responsive interfaces using modern CSS and media queries to ensure optimal user experience on both mobile and desktop.
- Working closely with UX/UI design teams to convert prototypes into functional and visually appealing interfaces.

Gorilla Logic – October 2020 to October 2021
Role: React Developer and Practice Lead
- Worked in a collaborative team to develop features through React.
- Developing landing pages and managing the state in Redux and React Query.
- Developed decouple and scalable components in React with Typescript.
- Styled landing pages using Styled components in React
- Components were rewritten for better performance and integration with the application.

- Debugged websites in different environments and solved bugs to accomplish development and team goals (according to the agreement Team - scrum methodologies).

Globant - January 2018 to September 2020
Role: Software Developer and Technical Lead

- Developed features and solved bugs in Angular and React.
- Managing the State of different components through Redux and RxJS in Angular.
- Improved code quality in React apps through Enzyme and React testing library
- Worked in collaborative teams using Scrum and SAFE methodologies
- Lead the Team to accomplish sprint goals.
- Mentoring junior developers in the development of their career
- Created Labs to teach React to developers of different career paths
- Styled landing pages using CSS, SASS, LESS, and libraries such as Carbon and Ant design.

Endava - August 2016 to January 2018
Role: Frontend Developer
- Responsible for developing new features for the client's internal products along with an Agile talented team of developers.
- Migration of some AngularJS components to Angular, using SASS as a pre-processor.
- Develop responsive Landing pages in Angular and RxJS.

EDUCATION

- Uniremington - 2003 to 2009 **-** Bachelor in SYSTEMS ENGINEERING.
- Eafit - 2023 to 2024 - Specialization in software development.

Volunteer Experience

Google Developer Expert (GDE) Angular & WEB TECHNOLOGIES 2019 – Present
Content Creator
Creating educational content for community events and mentoring developers in Web best practices.

GitHub Star 2020 - Present
Content Creator & Open Source
Creating content and supporting open-source projects of educational content.
