01 PROFILE

Forward-thinking Software Engineer with background working productively in dynamic environments. Fluent in Javascript programming language used to develop software within any industry. Proud team player focused on achieving project objectives with speed and accuracy.

02 EMPLOYMENT HISTORY

09/2021 — Present

Software Engineer at Toro Investimentos

Belo Horizonte - MG, Brazil

Toro Investimentos is one of the biggest stockbrokers in Brazil, with over 10 years of market experience. And as such, it has a lot of tech challenges.

In my daily work, I handle with high level scaling and security environments, working with AWS serveless services and microservices integrations, using Lambda, SQS, Kinesis, API Gateway, etc.

All applications have high level of test coverage, in order to get better code quality and prevent future bugs. To keep this process, its necessary to have a CI/CD pipeline using Azure DevOps environment, with build, quality and deploy stages.

09/2020 — 09/2021

Software Engineer at Paipe Co

Campo Bom - RS, Brazil

At Paipe I've worked as a back end developer, focused on Nodejs, Typescript and AWS as a cloud provider. Also I've participated on several projects, from applications integrated with IOT devices to solutions for farmers. Cloud technologies were present in my daily work, such as AWS (EBS, IOT Core, Dynamo DB, RDS, Lambda, etc) and Google Cloud (Firebase), using CI/CD automations to set the application deployment. I participated in the adoption of Typescript along with NestJs framework as standard for all backend services we developed, creating development patterns, architecture and deployment pipelines. With that, I started to dedicate myself to understanding Typescript's functionalities and which context to apply it

09/2019 — 09/2020

Full Stack Develope at Lighthouse Apps

Porto Alegre - RS, Brazil

I've worked as full stack developer, working on projects for companies in the retail sector, financial credit services and drug logistics, developing mobile apps, BFF services on the server side and developing CI/CD automations to deploy applications. The project structures involved consumption of data stored in Elastic Search, Oracle DB and Postgres DB, in addition to

providing the front end through PWA, mobile app and SPA. The main technologies used in this applications were Nodejs, .NET Core, ReactJS and React Native.

| 08/2016 — 09/2019 | **Full Stack Develope at Invento Casa Criativa** | *Taquara-RS, Brazil* |

I've worked as full stack developer, developing solutions for brand sites and e-commerce's. I've participated in the team's services transition, focusing mainly on e-commerce projects for footwear brands where I developed back-end, front-end structures, integrations with online payment methods, cloud environment configuration, cache services, database and email sending services

| 02/2016 — 12/2016 | **Front-End Trainee at Reweb** | *Porto Alegre - RS, Brazil* |

I've worked as front end trainee fixing HTML, CSS and Javascript bugs in landing pages. At this time, I've learned a lot about web fundamentals.

03 EDUCATION

| Mar 2016 — Present | **Faccat - Faculdades De Taquara** | *Taquara - RS, Brazil* |

Bachelor of Science: Computer Science And Programming
