Work experience

FullStack Developer   **March 2024 - now**
Galileo (Formerly Technisys)

Currently assigned to a Latam Financial company project, working on creating and supporting modules for the company's customers' applications. **Tech stack:** Java, Springboot, React, Redux, NodeJS, Oracle.

Senior Developer Consultant   **April 2022 - February 2024**
Thoughtworks

I was assigned to a US-based clothing company project, working on applications for the supply chain area. **Tech stack:** Java, Springboot, React, NodeJS, Oracle, MongoDB, Kafka, Azure, OCI.

Senior Development Engineer   **May 2021 - March 2022**
Banco del Austro, Ecuador

The company is a financial institution and I worked with the risk department in the development and maintenance of modules in a risk management software, and creating reports that were mainly intended for national control entities. **Tech stack:** Java, SpringBoot, Angular, NodeJs, Oracle, MS SQL Server.

Software Developer   **March 2018 - March 2022**
Vende Fácil App (https://vendefacil.app/), Ecuador

Vende Fácil App is a web-based platform that lets the users manage inventories, customers, suppliers, sales and electronic invoicing. I was part of the team that created the platform. **Tech stack:** Java, SpringBoot, Angular, NodeJS, MySQL.

Software Developer   **December 2020 - April 2021**
Advantech Digital, Ecuador

The company offers solutions for gas stations. Christian worked on the maintenance of the software modules related to sales. **Tech stack:** Java, Swing, MySQL.

Software Developer   **January 2019 - March 2021**
Kunansoft, Ecuador

I was part of the development team in the consultancy "Sistema de Gestión Metrológica - SGM" for the Ecuadorian government company CELEC EP. The consultancy consisted in the development of a platform for instrument inventory and calibration management. The platform had a web application and a mobile android application. **Tech stack:** Java, J2EE, Android, PostgreSQL.

Software Developer   **February 2015 - March 2021**
event2s/booking2s (https://www.event2s.com/), Ecuador

The project consists of a booking platform for events and travel services, the platform has integration with payment gateways such as Paypal or 2Checkout and lets suppliers directly offer and sell their services to the public. **Tech stack:** Java, J2EE, PostgreSQL.

Software Developer   **February 2020 - April 2020**
Universidad de Cuenca, Ecuador

Universidad de Cuenca is an educational institution, I was part of the team in charge of creating and maintaining modules of the academic management system. **Tech stack:** Java, SpringBoot, Angular, Redis, PostgreSQL.

Software Developer   **September 2018 - January 2019**
Universidad de Cuenca, Ecuador

There was a consultancy "Aplicación móvil para estudiantes de pregrado de la Universidad de Cuenca" about the development of a native application for Android and iOS that presents academic and institutional information to the students. I was involved in the development of the Android version. **Tech stack:** Java, Android

Software Developer   **November 2014 - January 2015**
Intelligent Tracer Software Ltd. (Intrasoft), Ecuador

Intrasoft is a technological consulting company where I worked developing features in different projects. **Tech stack:** Java, J2EE, MS SQL Server, PostgreSQL

Software Developer   **June 2012 - January 2013**
INDALO CABLE SL, Spain

The company offers a platform for enterprise management of stores that sell telecommunication services and equipment. I worked developing and maintaining features of the platform. **Tech Stack:** Java, J2EE, Oracle, MySQL
