Lead Software Developer, Redsis, Barranquilla

JULY 2016 — JUNE 2020

Developer team lead for a technology company.

Achievements:

- **Point of Service system.**

Desktop application design and development. This project was developed with WPF, C# and SignalR. The system integrates electronic payment, fiscal printers, as well as the support of most OPOS/No OPOS devices.

- **Travel Ticket**

Desktop application for travel ticket purchase. It was installed on a kiosk so the user will be able to buy tickets, select seats, show trip status, and print travel tickets.

DBA, Tecnosystems, Barranquilla

MARCH 2016 — JULY 2016

Achievements:

- Use Full-text index to improve the search by indexing access for full text queries against characters or binary column data.
- Developed stored procedures and triggers to automate data validation and transformation processes, reducing manual effort.
- Configured database replication to increase availability and scalability, allowing for more efficient system operations

Web Developer, Stefanini, Barranquilla

NOVEMBER 2014 — MARCH 2016

Achievements:

- Developed an API for a hospital, that connected the web application with 3rd party services and enabled the exchange of health data in realtime
- Implement best practices by using object-oriented programming (OOP) principles to improve code readability, scalability and maintainability
- Collaborated with cross-functional teams to identify customer requirements and develop technical solutions

Junior Software Developer, Technet / Integra.NET

JULY 2013 — OCTOBER 2014

Achievements:

- Debugged software, identified root causes, and proposed solutions to software issues
- Support on existing applications for several companies.
