WORK EXPERIENCE

Gorilla Logic

Java Developer – Consultant
Aug 2022 – Dec 2023

As Backend Java Developer, led proof of concept development using Spring Boot for Spring Cloud Streams, enhancing functionality. Developed new features in Java/Spring, migrated microservices to Spring Boot 3/Java 17, participated in code reviews and team meetings to streamline development. Implemented bug fixes, performance optimizations, and created comprehensive documentation for knowledge sharing.

Globant

Java Developer Senior – Technical Leader
Oct 2021 – Aug 2022

As a Technical Leader at Disney Parks, he was instrumental in leading and supporting the seamless migration from Spring Framework to the innovative Quarkus Framework, utilizing AWS Lambda Functions. Additionally, he has been at the forefront of the sustainment process, ensuring the smooth running of the microservices related to the project. His exceptional leadership skills and technical prowess have been key in delivering outstanding results for company.

Java Developer Semi Senior
Mar 2020-Oct 2021

As a Java Developer at Disney Cruise Line, he took on a pivotal role, utilizing a range of cutting-edge technologies and frameworks such as Apache Camel, Kafka, Spring Boot, Restful services, Jenkins, JDBC, Apache Tomcat, Apache Maven, Docker, Kubernetes, Amazon AWS, AppDynamics, among others. His responsibilities included analyzing and developing new features while resolving complex issues related to microservices supported by the technologies.

Additionally, he has further broadened his skillset by participating in the .net Academy where he received specialized training in C#, .Net Framework, Microsoft Azure, and .Net Core. He also completed the testing automation academy, demonstrating his commitment to continuous professional development.

Application Development Analyst
Dec 2015 – Mar 2020

Accenture

He is an accomplished Java Developer with experience in leading backend migration projects from monolithic applications to Rest API web services using Spring Boot. He has also worked as a PL-SQL Developer with SOAP Web Services in Java. Additionally, he is passionate about volunteering his time and knowledge to teach young people JavaScript programming and HTML through Accenture and CoderDojo.

SOFT SKILLS

I am a cheerful, creative, and passionate individual who is deeply committed to achieving my objectives. My excellent verbal and written communication skills, coupled with my attention to detail, critical thinking, and analytical skills, make me valuable member for any team. I thrive in team working environments, both as a member and as a tech lead, and am always eager to take on new challenges and deliver results.

AREAS OF EXPERTISE

Functional

- Project management with ITIL
- Software Testing Strategy and Management
- E2E ITIL Incident Management Flow
- Analysis and development of software requirements.
- Management of metrics and indicators SLAs, KPIs
- Software development under the agile methodology scheme

Industries of expertise

- Horizontal Property
- Supplier Management.
- Accounting and Finance.
- Telecommunications.
- Service Desk and Help Desk
- Cruise Line
- Food products

Application Development Associate
Dec. 2015 – May. 2017

As a skilled Java Developer, he has extensive experience working with Oracle Application Framework and Oracle EBS. His expertise in these technologies has been invaluable in delivering exceptional results for the organizations he has worked with.

Moreover, he has also displayed his exceptional leadership skills by taking charge of the testing process start-up, achieving to design and implement the test strategy on a software factory in the Alpina project. His meticulous approach to testing and keen eye for detail have been instrumental in achieving optimal testing outcomes, further cementing his reputation as a seasoned software professional.

Service Desk Team Manager
Sep. 2014 – Dec. 2015

As a Team Leader, he provided crucial support to the Service Desk during out-of-hours operations. Under his guidance, the team was able to effectively manage more than ten key accounts, including Baxter, Unilever, Delphi, Novartis, Kellogg's, Cencosud, and ISAGEN, among others.

Unisys

Technical Support Representative
Apr 2012 – Sep 2014

During and after the migration of the Unilever Spain help desk project from Budapest to Colombia, he served as a technical support representative on both the first and second levels.

IT department technical representative
May 2009– Apr 2012

Parque Central Bavaria P.H

As a Technical Support Analyst, he not only played a critical role in leading the restructuring of the technology area but also successfully established and implemented a new service model for the IT department. In addition to this, he also took charge of evaluating the performance of custom software development providers for access and parking controls.

Technical Support Representative Onsite
Nov 2006 – Nov 2007

Informatica Siglo 21

He started his career as an On-Site Technical Support Representative, he was responsible for preparing and configuring technical resources for software factory projects and the company.

CERTIFICATIONS

- Java programmer SE 8, Oracle certified associate.
- ITIL® Foundation Certificate in IT Service Management

EDUCATION

University	**Universidad Catolica de Colombia** **Jun 2007 – Apr 2016** Systems engineer with emphasis on software design and development.
Courses	**Udemy** - Spring & Hibernate for Beginners (includes Spring Boot). - Reactive programming with Spring Boot 2 and Spring Webflux. - Serverless using AWS Lambda for Java Developers. - Introduction to amazon web services from scratch. - Microservices with Spring Boot and Spring Cloud Netflix Eureka.

SKILLS

Database Technologies	**PostgreSQL, Basic Knowledge on MongoDB, MySQL, SQL Server, Oracle Database.**
Backend Technologies	**Java 8, Java 11, 17, JavaScript, C#, Intermediate Knowledge on Oracle PLSQL.**
Cloud Platforms	**Intermediate knowledge in Amazon AWS, Basic knowledge in Azure.**
Frameworks	**Spring Framework, Apache Camel, Mockito, Junit 4, Junit 5, .Net, Net Core, Quarkus, Spring Native.**
Messaging	**Kafka, Rabbit MQ.**
Containerization	**Intermediate knowledge using Docker, Basic Knowledge using Kubernetes.**
