Languages	English, Spanish

Experience

Sainapsis   *Remote*

Senior Front-end developer   *Dec 2023 - Currently*

- Start-up for creating an app to support the sales teams with IA. The technologies used were React, ReactNative, NextJs, JavaScript, TypeScript, Apollo GraphQL, and Material UI, we focused on task tracking, process automation, and design support. Deployment on AWS involved tools like CodeCommit, Amplify, AppSync, and S3.

Evolve   *Remote*

Semi-senior Front-end developer   *Feb 2022 - Aug 2023*

- Application for mechanical, electrical, and plumbing industries. Using React, JavaScript, TypeScript, Apollo GraphQL, and Material UI, we focused on task tracking, process automation, and design support. Deployment on AWS involved tools like CodeCommit, Amplify, AppSync, and S3. I designed UI components, proposed architectural approaches, and conducted thorough testing with end-to-end and unit tests to ensure reliability.

Catsupp - Cafeto software   *Cali, Colombia*

FRONT-END DEVELOPER   *Feb 2021 - Feb 2022*

- Catsup web application to record, manage, and create reports of projects. The goal of this application was to track the companies' requirements and which candidates fit more in their projects. Also, the application gives feedback on every hiring process. The application was developed with React, React Redux, Tailwind, Strappi and GraphQL. My functions were to create different UI components, propose and document the architecture's application, mentor two junior developers, and maintain the quality of the application with unit tests.

Greetbox - Cafeto software   *Cali, Colombia*

FRONT-END DEVELOPER   *June 2020 - Oct 2020*

- Greetbox was a mobile app for sharing and creating personalized greeting cards. Built with JavaScript, React Native, React hooks, Redux, and Sagas, my role included UI development, backend interactions, documenting component behavior, achieving 100% unit test coverage, and presenting demos to clients for feedback.

Connect - Cafeto Software - Pros   *Cali, Colombia / Houston, EEUU*

FullStack Developer   *Oct 2017 - Jun 2020*

- Connect is a customer support portal tailored for Pros, tracking reported product issues, offering documentation and forums for common questions, and generating cloud service availability reports. Technologies include JavaScript, jQuery, HTML, CSS, LESS, PHP, Drupal 7/8, MySQL, and React. I developed and maintained site forms and sections, improved UI, created API services for system communication, built an MVP for potential Drupal migration, and integrated the portal with a customer's API.

DAIS - SUDO   *Cali, Colombia*

Junior Web Developer   *Apr 2016 - Oct 2017*

- Project to audit the database records and transitions for specific projects. This project requires an interception of the data sent by different applications to the Database, decoding that information, and saving it. Technologies: Typescript, Angular, HTML, CSS, PHP, Symfony.
