Guillermo Dolores Vicencio

Senior software engineer

momosolamente@gmail.com **|** +525586768777 **|** linkedin.com/in/gdolores/ **|** foorasteroo.github.io

With over 13 years of experience, I've worked on small and big companies and shared my knowledge and learned from others as well, creating products and ideas from scratch to production, contributing to the entire product lifecycle with fellows around the world. Excited to collaborate with people and deliver quality software with the best standards.

Work experience

- **SENIOR SOFTWARE ENGINEER at PayPal.**
January 2023 - Created, maintained and deployed different microservices and web projects used across different areas in the company, particularly in customer credit related. Participated in planning, and documenting processes and new features, training and collaborating with new teammates. Migrated CI/CD pipelines with Jenkins and infrastructure using GCP and proprietary infrastructure. Tech used: React, Javascript, Redux, Jenkins, Linux Bash, Go, CSS3 html5, etc.

- **SENIOR SOFTWARE ENGINEER at OneVillage & Springboard.**
August 2021 - January 2023 Worked on multiple projects with different startups creating software on backend and frontend sides, also some devops activities. Creating SPAs and SSR Applications with NEXTjs, React, Nest.js, developed and consumed REST APIs and web services written with Nodejs, Python with Django and C#, used PostgreSQL as database and external services like SanityCSM; used AWS as part of cloud infrastructure, configuring and deploying to multiple server environments etc.

- **SENIOR SOFTWARE ENGINEER at Legitscript.**
August 2020 - August 2021. Worked developing new features and supporting different apps written with Ruby on Rails on the backend and used HTML, JS, React and CSS frameworks on the fronted side. PostgreSQL, MySQL, ElasticSearch and Redis as databases and constantly monitoring systems performance with tools like Grafana, Prometheus, Vendor metrics etc. Participated in planning about how to increase performance and save operation costs. Used AWS products like EC2, S3, AMI, Route53 etc.

- **SENIOR SOFTWARE ENGINEER at HBO - Tribune Publishing - Globant.**
January 2020 - June 2020. Due COVID-19 pandemic situation several projects and clients changed their business plans and I had the opportunity to collaborate with different projects like HBO streaming platform, Tribune Publishing and multiple news websites like Chicago Tribune, LA Times etc, and Realogy inc. on social media marketing platforms. Used languages and technologies like Angular, React, Nodejs, AWS, Api REST, etc.

Technologies & Skills

General

Agile methodologies with SCRUM and Kanban, version control systems with GIT. Research and documentation, self-learning, staff training, requirements analysis, planning and coordination, teamwork, working with best practices for development and processes optimization.

Frontend

HTML5, CSS3, Javascript (ES6+), Typescript, React, Angular, Coffeescript, JQuery, EmberJS. CSS Preprocessors like Stylus, SASS and Less. Tailwind, StyledComponents,Task runners and module bundlers like Gulp JS, Grunt JS and Webpack, NPM, Bower, Bootstrap, Foundation Bulma, etc.

Backend

Node.js, PHP, Ruby. Frameworks like Laravel and Symfony, Express, Next.js, Nest.js, Rails and Python at basic level, REST APIs design, MVC Architecture, Object Oriented Programming.

Devops

Docker, Kubernetes, AWS, Servers setup, UNIX systems and Windows, Terraform and Ansible, CPanel, Plesk and administration through SSH. Apache2 and Nginx web servers. Database servers, DNS setup, network administration, technical support. Grafana and Prometheus for monitoring.

- **SENIOR FRONTEND DEVELOPER at American Express - iSeatz - Globant**

January 2017 – January 2020. Working as frontend development with big applications, particularly for American Express Travel websites using React, Redux, and best practices for complex apps with a lot of business logic, research, planning and technical discovery, performance optimization, QA Testing. Using tools like jira, trello and many more which implements agile workflows like SCRUM and KANBAN.

- **SENIOR WEB DEVELOPER at Hulu - Globant**

August 2016 - 2017. Worked on software maintenance of different applications for video streaming service. PS4 and Xbox Hulu apps and websites as well. Monitoring performance and reporting possible bugs, adding features to the code base and testing on multiple devices as well.

- **SENIOR WEB UI DEVELOPER at Globant**

August 2016 – June 2020. Web development, mostly Frontend side, research, planning and development, performance optimization, QA Testing. Using tools like jira, trello and many more which implements agile workflows like SCRUM and KANBAN. Participated in multiple projects through different clients.

- **SENIOR SOFTWARE ENGINEER at Focal Systems**

April 2016 – August 2016. Web development, frontend and backend sides, system monitoring, data analysis, services scalability, workers programming with NodeJS, research and development for new technologies, performance optimization and QA testing.

- **LEAD WEB DEVELOPER at RedBanana and Freelance**

October 2013 – March 2016. Software development, mobile applications and web platforms. Project management and tech lead. Requirements analysis, planning and consultancy. Staff training, research, processes optimization and new technologies development. Web application and websites development, landing pages, newsletter, intranets, websites legacy support, load optimization y seo enhancement, responsive web design, databases administration. Computer technical support, preventive and corrective support, training and customer support. Languages and tools used: php, html5, css3, javascript, Angular JS stylus, sass, git, laravel, mysql, Couchdb, ionic, mysql. CMS, like Wordpress, y Joomla.

- **WEB DEVELOPER at Altusmedia**

August 2012 – September 2013. Platforms and web infrastructure, websites and web apps programming, landing pages, newsletter, server administration, intranet development, mobile applications, social media apps. Load optimization, SEO enhancement and database administration. Languages and tools used: php, cms like wordpress, Joomla, drupal, html5, css3, javascript, mysql, etc.

- **SYSADMIN & WEBMASTER at Lasertec**

November 2010 – March 2012. ERP system implementation, domain names administration (DNS), website development and servers and network administration. Database administration, staff training, basic management with VoIP systems, technical support and intranet development.

Education

Bachelor 's Degree: Computer Science: Universidad Nacional Autónoma de México. (2013 - paused).

Diploma: Computer Systems - CCPM (2005 - 2007).

Diploma: Computational Graphic Design - CCPM (2005 - 2007).
